In re Patent No. 10,943,030 :
Issue Date: 9 Mar 2021 : **DECISION ON PETITION**
Application No. 12/316,699 :
Filing or 371(c) Date: 15 Dec 2008 :
Attorney Docket No. None :

This is a response to Patentee's petition pursuant to 37 C.F.R. § 1.705(b) filed May 10, 2021, requesting that the Office adjust the patent term adjustment from 1576 days to 2427 days.

The Office acknowledges the submission of the \$210.00 fee set forth in 37 C.F.R. § 1.18(e). No additional fees are required. A review of the electronic file indicates that this patent is not subject to a terminal disclaimer.

This redetermination of patent term adjustment is NOT the Director's decision on the applicant's request for reconsideration for purposes of seeking judicial review under 35 U.S.C. § 154(b)(4).

Relevant Procedural History

On March 9, 2021, the Office determined that applicant was entitled to 1576 days of PTA.

On May 10, 2021 (May 9, 2021 fell on a Sunday), Patentee filed a request for redetermination of patent term adjustment requesting a PTA of 2427 days, pursuant to 37 C.F.R. § 1.705(b).

Decision

Upon review, the USPTO finds that Patentee is entitled to 1525 days of PTA.

Four periods of reduction and one period of "A" delay are in dispute.

"A" Delay

The Patentee and Office agree that an adjustment of 750 days is warranted under 37 C.F.R. § 1.703(a)(1) beginning on February 16, 2010 (the day after the date that is fourteen months after the day the application was filed and ending on March 6, 2012 (the date the first Office action was mailed).

The above-identified application became abandoned for failure to reply within the meaning of 37 C.F.R §1.113 in a timely manner to the final Office action mailed April 2, 2013, which set a shortened statutory period for reply of three months. An after-final amendment was received on October 2, 2013 along with a one-month extension of time, and an advisory action was mailed on October 18, 2013. No extensions of time under the provisions of 37 C.F.R §1.136(a) were obtained, and no further responses were received. Accordingly, this application became abandoned on August 3, 2013. A notice of abandonment was mailed on February 7, 2014.

- Applicant filed a first RCE on April 7, 2014 along with amended claims and a petition pursuant to 37 C.F.R. § 1.137(a) to revive the application.
- The USPTO mailed a decision on April 30, 2014 that dismissed the February 7, 2014 petition.
- Applicant filed a request pursuant to 37 C.F.R. § 1.48 on August 24, 2015.
- Applicant filed a renewed petition pursuant to 37 C.F.R. § 1.137(a) on February 6, 2016.
- The USPTO mailed a decision on March 7, 2016 that dismissed the February 6, 2016 petition.
- Applicant filed a petition pursuant to 37 C.F.R. § 1.183 on August 8, 2016 requesting suspension of the rules.
- Applicant filed a renewed petition pursuant to 37 C.F.R. § 1.137(a) on August 22, 2016.
- The USPTO mailed a decision on June 29, 2017 that, *inter alia*, dismissed the August 22, 2016 petition.
- Applicant filed a second RCE on August 29, 2017 along with, *inter alia*, amended claims, remarks, and a renewed petition.
- The USPTO mailed a decision on October 31, 2017 that, *inter alia*, dismissed the August 29, 2017 petition.
- Applicant filed, *inter alia*, a renewed petition pursuant to 37 C.F.R. § 1.137(a) on January 2, 2018.
- The USPTO mailed a decision on February 7, 2018 that, *inter alia*, dismissed the January 2, 2018 petition.
- Applicant filed, *inter alia*, a renewed petition pursuant to 37 C.F.R. § 1.137(a) on April 9, 2018. A supplement was received on April 10, 2018.
- The USPTO mailed a corrected decision on the petition pursuant to 37 C.F.R. § 1.137(a) on May 24, 2018 that, *inter alia*, granted the August 29, 2017 petition. The decision

states in the first footnote on page one of the decision that the decision “replaces the petition decisions issued on October 31, 2017 and February 17, 2018.”

- The corrected decision mailed on May 24, 2018 further states on page four of the decision that “[t]his petition (sic) is being referred to the Technology Center 2400 for further processing in accordance with this decision.” Accordingly, the USPTO mailed a non-final Office action on August 6, 2018 that indicates on the second numbered page that the RCE and the submission filed on August 29, 2017 have been entered. Hence, while the second RCE was not the first RCE to be filed in this application, the second RCE was entered while the first (filed on April 7, 2014) was not.

The USPTO entered an adjustment of 220 days under 37 C.F.R. § 1.703(a)(2) beginning on December 30, 2017 (the day after the date that is four months after the day the second RCE was filed - August 29, 2016) and ending on August 6, 2018 (the date the non-final Office action was mailed). Patentee agrees with this adjustment.

However, the non-final Office action mailed on August 6, 2018 was not mailed in response to the second RCE filed on August 29, 2017 – it was mailed as a result of the mailing of the corrected decision on the petition pursuant to 37 C.F.R. § 1.137(a) on May 24, 2018. Consequently, the 220-day adjustment is not warranted under 37 C.F.R. § 1.703(a)(2), and this adjustment has been removed.

“B” Delay

The Patentee and Office agree there are 2647 days of “B” delay.

The Novartis decision includes “instructions” for calculating the period of “B” delay. Specifically, the decision states,

The better reading of the language is that the patent term adjustment time [for “B” delay] should be calculated by determining the length of the time between application and patent issuance, then subtracting any continued examination time (and other time identified in (i), (ii), and (iii) of (b)(1)(B)) and determining the extent to which the result exceeds three years.

The length of time between application and issuance is 4468 days, which is the number of days beginning on the filing date of the application (December 15, 2008) and ending on the date the patent issued (March 9, 2021).

The time consumed by continued examination is 725 days. The time consumed by continued examination includes the period beginning on the filing date of the second RCE (August 29, 2017) and ending on the mailing date of the first notice of allowance (August 23, 2019).

The number of days beginning on the filing date of application (December 15, 2008) and ending on the date three years after the filing date of the application (December 15, 2011) is 1096 days.

The result of subtracting the time consumed by continued examination (725 days) from the length of time between the application's filing date and issuance (4468 days) is 3743 days, which exceeds three years (1096 days) by 2647 days. Therefore, the period of "B" delay is 2647 days.

"C" Delay

The Patentee and Office agree there are zero days of "C" delay.

Overlap

The Patentee and Office agree there are 82 days of overlap.

The Office finds that the number of overlapping days of Office delay is 82 days. In *Wyeth v. Kappos*, 591 F.3d 1364 (Fed. Cir. 2010), the Court of Appeals for the Federal Circuit determined that overlap occurs when the calendar days overlap between the "A" and "B" delays. Under this interpretation, the Office finds that the overlapping period of "A" delay and "B" delay is 82 days.

The Office finds that the periods of "B" delay are:

- (1) beginning on December 16, 2011 (date that is the day after the three year anniversary of the filing date of the application) and ending on August 28, 2017 (date that is the day before the second RCE was filed) for a period of 2083 days; and
- (2) beginning on August 24, 2019 (date that is the day after the first notice of allowance was mailed) and ending on March 9, 2021 (date of patent issuance) for a period of 564 days.

$$2083 + 564 = 2647.$$

The Office finds that the overlapping period of "A" delay is the terminal 82-day portion of the aforementioned 750 day adjustment that is warranted under 37 C.F.R. § 1.703(a)(1), beginning on December 16, 2011 (date that is the day after the three year anniversary of the filing date of the application) and ending on March 6, 2012 (the date the first Office action was mailed).

Reduction under 35 U.S.C. § 154(b)(2)(C)(iii) & 37 CFR 1.704 [Applicant Delay]

The Office finds that, under 37 C.F.R. § 1.704, the amount of PTA should be reduced by 1790 days. The Office has determined that the Patentee failed to engage in reasonable efforts to conclude processing or examination of its application during the following periods.

- (1) A 112-day period pursuant to 37 C.F.R. § 1.704(c)(7) from September 7, 2012 until December 27, 2012 because the Office mailed a non-final Office action on March 6, 2012. Patentee filed its remarks and amendments to the claims and specification on September 6, 2012, the USPTO mailed a Notice of Non-compliant Amendment on November 27, 2012, and Patentee filed, *inter alia*, remarks and amendments to the claims and specification on December 27, 2012.

Accordingly, the reduction should have been 112 days pursuant to 37 C.F.R.

§ 1.704(c)(7) rather than the previously determined 204 days pursuant to 37 C.F.R. § 1.704(b).

Consequently, the 204-day reduction has been removed and a 112-day reduction has been added.

Patentee appears to agree with the 204-day reduction.

- (2) The USPTO entered a reduction of 1519 days pursuant to 37 C.F.R. § 1.704(b) from July 3, 2013 until August 29, 2017 because the Office mailed a final rejection on April 2, 2013. Accordingly, the three-month response date was July 2, 2013. However, the Patentee did not file its second RCE until August 29, 2017.

It is noted that a reduction of 1427 days is warranted pursuant to 37 C.F.R. § 1.704(c)(3) from October 3, 2013 until August 29, 2017 because as set forth above, this application became abandoned on October 3, 2013 and a grantable petition was filed on August 29, 2017. However, since this entire 1427-day period overlaps with the 1519-day period, the USPTO has not entered the 1427-day reduction.

Patentee disagrees with the 1519 day reduction pursuant to 37 C.F.R. § 1.704(b). Patentee agrees the period should begin on October 3, 2013 when this application became abandoned but argues it should end on August 23, 2015, the day before a request pursuant to 37 C.F.R. § 1.48 was filed, since Applicant feels the request pursuant to 37 C.F.R. § 1.48 “included all the necessary items for a grantable decision.”¹ This would result in a reduction of 690 days; however Patentee appears to calculate this period to total 851 days.

Patentee’s argument has been given careful consideration, and has been deemed to be unpersuasive. 37 C.F.R. § 1.704(b) states, *in toto*:

With respect to the grounds for adjustment set forth in §§ 1.702(a) through (e), and in particular the ground of adjustment set forth in § 1.702(b), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude processing or examination of an application for the cumulative total of any periods of time in excess of three months that are taken to reply to any notice or action by the Office making any rejection, objection, argument, or other request, measuring such three-month period from the date the notice or action was mailed or given to the applicant, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date that is three months after the date of mailing or transmission of the Office communication notifying the applicant of the rejection, objection, argument, or other request and ending on the date the reply was filed. The period, or shortened statutory period, for reply that is set in the Office action or notice has no effect on the three-month period set forth in this paragraph.

¹ Petition, page 4.

The USPTO did not consider the August 23, 2015 request pursuant to 37 C.F.R. § 1.48 to satisfy all elements of the petition to revive the abandoned application.² All elements of the petition to revive the abandoned application were not satisfied until August 29, 2017, and it follows the period of reduction pursuant to 37 C.F.R. § 1.704(b) terminates on that date.

- (3) The USPTO entered a reduction of 122 days pursuant to 37 C.F.R. § 1.704(c)(3). Patentee disagrees that any reduction is warranted and the Office agrees. Consequently, the 122-day reduction has been removed.
- (4) The USPTO entered a reduction of 84 days pursuant to 37 C.F.R. § 1.704(b) from November 7, 2018 until January 29, 2019 because the Office mailed a non-final rejection on August 6, 2018. Accordingly, the three-month response date was November 6, 2018. However, the Patentee did not file its remarks and amendment to the claims until January 29, 2019.

Patentee appears to agree with this reduction.

- (5) The USPTO entered a reduction of 17 days pursuant to 37 C.F.R. § 1.704(c)(10) from September 29, 2020 until October 15, 2020 because the Office mailed a notice of allowance on September 28, 2020, Patentee filed a request pursuant to 37 C.F.R. § 1.48 on September 29, 2020, and the USPTO mailed an unrelated miscellaneous communication concerning Information Disclosure Statements received on September 6, 2012 and January 10, 2012.

The USPTO finds that a single-day reduction pursuant to 37 C.F.R. § 1.704(c)(10) is warranted, beginning on September 29, 2020 (the day after the Office mailed a notice of allowance) and ending on this same day when Patentee filed the request pursuant to 37 C.F.R. § 1.48.

Consequently, the 17-day reduction has been removed and a single-day reduction has been added.

Patentee disagrees that any reduction is warranted, and argues “the communication from the Office on 10/15/200 was a notification by the examiner of the receipt of previously submitted IDS submissions by the Applicant.”³

Patentee’s argument has been given careful consideration, and has been deemed to be unpersuasive. 37 C.F.R. § 1.704(c)(10) sets forth, *in toto*:

Circumstances that constitute a failure of the applicant to engage in reasonable efforts to conclude processing or examination of an application also include the following circumstances, which will result in the following reduction of the

² It is noted applicant did not appear to file a petition to withdraw the holding of abandonment pursuant to 37 C.F.R. § 1.181; instead, a petition to revive the application pursuant to 37 C.F.R. § 1.137(a) was filed.

³ Petition, page 8.

period of adjustment set forth in § 1.703 to the extent that the periods are not overlapping:

Submission of an amendment under § 1.312 or other paper, other than an amendment under § 1.312 or other paper expressly requested by the Office or a request for continued examination in compliance with § 1.114, after a notice of allowance has been given or mailed, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date of mailing of the notice of allowance under 35 U.S.C. 151 and ending on the date the amendment under § 1.312 or other paper was filed;

Patentee submitted a request pursuant to 37 C.F.R. § 1.48 after a notice of allowance was mailed, and it follows a reduction pursuant to 37 C.F.R. § 1.704(c)(10) is warranted.

- (6) The USPTO entered a reduction of 13 days pursuant to 37 C.F.R. § 1.704(c)(10), from December 11, 2020 until December 23, 2020 because the Office mailed a notice of allowance on September 28, 2020, Patentee filed an IDS on December 11, 2020 (the undersigned has not located a statement pursuant to 37 C.F.R. §§ 1.704(d)(1)(i) or (ii) among the concurrently submitted papers), and the USPTO mailed a corrected notice of allowability on December 23, 2020.

The USPTO finds that a 74-day reduction pursuant to 37 C.F.R. § 1.704(c)(10) is warranted, beginning on September 29, 2020 (the day after the Office mailed a notice of allowance) and ending on December 11, 2020, the day the IDS was received.

Consequently, the 13-day reduction has been removed and a reduction of 74 days has been added.

Patentee disagrees that any reduction is warranted. Patentee argues that no delay should be attributed since “Applicant was submitting remaining items on previous IDS submissions and further the Office was still reviewing Applicant’s petition filed 8/2/2020.”

Patentee’s argument has been given careful consideration, and has been deemed to be unpersuasive. Patentee submitted an IDS after a notice of allowance was mailed, and it follows a reduction pursuant to 37 C.F.R. § 1.704(c)(10) is warranted.

Overall PTA Calculation

Formula:

“A” delay + “B” delay + “C” delay - overlap - applicant delay = X.

USPTO’s Calculation:

750 + 2647 (4468 – 1096 – 725) + 0 – 82 – 1790 (112 + 1519 + 84 + 1 + 74) = 1525

Patentee's Calculation:

$970 (750 + 220) + 2647 (4468 - 1096 - 725) + 0 - 82 - 1139 (204 + 851 + 84) = 2396.$

Patentee calculates a total PTA of 2427, and the discrepancy appears to stem from the use of the figure 1108 instead of 1139 in the above formula. However, since Patentee has not fully revealed his math, the undersigned is not able to determine the precise discrepancy. The figure 1108 appears on the seventh and eleventh pages of this petition, but it is not entirely clear how Patentee arrived at this number.

Conclusion

Patentee is entitled to PTA of 1525 days. Using the formula "A" delay + "B" delay + "C" delay - overlap - applicant delay = X, the amount of PTA is calculated as following: $750 + 2647 + 0 - 82 - 1790 = 1525$ days.

If Patentee seeks a review of this decision, Patentee must request reconsideration within **TWO (2) months** from the mail date of this decision. Extensions of time pursuant to 37 C.F.R. § 1.136(a) are available, pursuant to M.P.E.P. § 2734(I). If applicant does not reply, then the Office will *sua sponte* issue a certificate of correction in the amount of 1525 days.

REQUEST FOR CERTIFICATE OF CORRECTION UNDER 35 U.S.C. §254

Oct 14, 2021

Commissioner for Patents
Office of Data Management Attention: Certificates of Correction Branch
P.O. Box 1450
Alexandria, VA 22313-1450

Sir/Madam:

In accordance with the provisions of 35 U.S.C. §254 and 37 C.F.R. §1.322(a), please issue a Certificate of Correction for the above-referenced application, patent Serial #10,943,030, (the '030' patent) to correct an error related to the patent's term adjustment ('PTA'/Patent Term Adjustment').

It is believed that the patent term adjustment for the '030 patent should be 2427 days. A correction request through a 'Reconsideration of Patent Term' petition filed May 10, 2021, from 1576 days to 2427 days, a difference of 851 days, explains the correct 'PTA' day count that should be awarded to the '030 patent.

Attached are printout copies of the application file as navigated in the Office's 'Pair' system, 'PED' system as well as the '030 patent's XML data set available for download from the Office's 'PED' system. Having the same database populating both of the Office's 'Pair' and 'PED'

environments, **the error by the office is easily noticed**. Further, it should be also noticed that within the singly enveloped 'PED' XML data set download of the application from the Office's 'PED' web site, both the 'Transaction' and 'PTA' data exist and present the event date differences within the same said XML data set envelope.

Therefore, in view of the foregoing remarks, it is respectfully submitted that this request for a certificate of correction showing a granted 'Patent Term Adjustment' of the '030 Patent of **2427** days and a certificate of correction be issued indicating such corrected term adjustment calculation.

No fee is believed due as a previous fee payment for a 'Reconsideration of Patent Term Adjustment' petition, filed May 10, 2021, was paid to the Office as well as, due to an error by the Office, under 35 U.S.C. §254, no fee is required.

A certificate of correction is respectfully requested. Thank you for your kind consideration and time with this correspondence.

Respectfully submitted,

/JohnLewisGuymonJr/

37 C.F.R. §1.705(b) - PETITION REQUESTING RECONSIDERATION OF THE PATENT TERM ADJUSTMENT

May 10, 2021

Commissioner for Patents
Office of Data Management Attention: Certificates of Correction Branch
P.O. Box 1450
Alexandria, VA 22313-1450

Sir/Madam:

This request is submitted for reconsideration of the Patent Term Adjustment ("PTA") of U.S. Patent No. 10,943,030 ("the '030' Patent"), which issued on March 9, 2021 from U.S. Patent Application No. 12/316,699 ("the '699' Application"), filed December 15, 2008. This request is submitted within two month's next business day of the date of issuance of the '030 Patent, under 37 C.F.R. §1.7(a) 'Mother's Day' Sunday.

The '030 Patent was granted 1576 days of PTA. However, it is respectfully submitted that the '030 Patent is entitled to **2427** days of PTA under 35 U.S.C. §154(b) in light of the following remarks. Reconsideration of the PTA granted to the '030 Patent is therefore respectfully requested under 37 C.F.R. §1.705(b).

Applicant includes within this petition statements of facts involved in regard to said reconsideration. It is noted that the '030 Patent is not subject to a terminal disclaimer. The fee set forth in 37 C.F.R. §1.18(e) has been included.

Office 'A' Delay

Under 35 U.S.C. §154(pre-AIA)(b)(1)(A), "Office 'A' Delay", the Office granted a total of **970** days of PTA for its delay in issuing the '030 Patent within three years of the filing date of the '699 Application.¹

Under 35 U.S.C. §154(pre-AIA)(b)(1)(A)(i), the Office granted a total of **750** days of PTA for its delay in mailing a notification under 35 U.S.C. §132 within fourteen months of the filing date of the '699 Application. For the purposes of this request, the Applicant does not dispute the **750** days of delay attributed to the Office but reserves the right to dispute this delay in the future.

Under 35 U.S.C. §154(pre-AIA)(b)(1)(A)(ii), the Office granted a total of **220** days of PTA for its delay in failing to mail a notification under 35 U.S.C. §132 within four months after the date on which reply was filed.²

Applicant does not dispute the **970** days of A-Delay the Office has granted.

Office 'B' Delay

Under 35 U.S.C. §154(b)(1)(B), "Office 'B' Delay", the Office granted a total of **2647** days of PTA for its delay in issuing the '030 Patent within three years of the filing date of the '699 Application.³

The time period from the 3 year mark of 12/16/2011 to the RCE dated 8/29/2017, the Office granted, Applicant believes, a total of **2083** days PTA;

¹ The '030 Application, filed on December 15, 2008, issued as the '030 Patent on March 9, 2021. An RCE was filed August 29, 2017. The three year mark of December 15, 2011 is overlapped by the Office's A-Delay (14 month) 'First Office Action' dated 3/6/2012 by 82 days.

² The Office responded to a Request For Reconsideration submitted August 29, 2017 by issuing a Non-Final Rejection on August 6, 2018, resulting in 220 days of A-Delay.

³ The '030 Application, filed on December 15, 2008, issued as the '030 Patent on March 9, 2021. An RCE was filed August 29, 2017. The three year mark of December 15, 2011 is overlapped by the Office's A-Delay (14 month) 'First Office Action' dated 3/6/2012 by 82 days.

The time period from 8/23/2019 to 3/9/2021 the Office granted, Applicant believes, a total **564** days of PTA for the time period from the 'Notice Of Allowance' to 'Issue Date'.

Applicant does not dispute the **2647** days of B-Delay the Office has granted.

Office 'C' Delay

Under 35 U.S.C. §154(b)(1)(C), "Office 'C' Delay", the Office granted a total of **0** days due to no delays.

Applicant does not dispute the **0** days of C-Delay the Office has granted.

Applicant's Delays

As required under 37 C.F.R. §1.705(b)(2)(iv)(A), Applicant states, below, circumstances during the prosecution of the application that constitute a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in 37 C.F.R. §1.704; Of relevance thereof, Applicant, in support of said circumstances during prosecution of the application, **STATES** here and now:

Applicant submits he has shown due care and due diligence, duty of candor and good faith toward his continued effort to conclude processing or examination of the '699 Application, wanting continued examination until issuance, having delays unavoidable and unintentional and were written with explanation in all of Applicant's responses.

Applicant true and honestly believes correspondence back and forth with the Office and the actions taken were appropriate and done correctly.

Applicant submits he had established 'Micro entity' status established with the Office October 18, 2013 Advisory action a response having consideration of said 'Micro entity' status.

Applicant, within two (2) months upon receipt of the Notice of Abandonment, filed a Petition To Withdraw Holding of Abandonment. Applicant believes that the 1519 PTA days the Office attributed to Applicant delay for the time period from 4/2/2013 to 8/29/2017 under 37 C.F.R. §1.704(c)(4) should have this Withdraw Holding of Abandonment filing by Applicant considered when considering the period of adjustment set forth in 37 C.F.R. §1.703.

Applicant, during multiple discussions with the Attorney Advisor who signed the April 30, 2014 petition decision, discussed the filing of the Correction of Inventorship petition.

The Correction of Inventorship petition filed 8/24/2015 included all the necessary items for a grantable decision. Applicant feels and believes that the delay duration from the filing of the said Correction Of Inventorship petition until the granting of the 'RCE' filed 8/29/2017 was improperly attributed as Applicant delay for some of the delay 'sub' periods during said duration other than any fair periods of time where Applicant asked for extensions of time in conjunction with other correspondence.

- * The petition was handled by the Office of Petitions ('OPET').
- * The petition should have been processed by the Office of Patent Application Processing (OPAP).
- * The petition was filed and processed incorrectly.
- * Applicant was diligent in his submission of fair and proper evidence including a new 'Supplemental Oath and 'Supplemental Declaration of Inventorship.
- * The Petition, reconsiderations and 'Petition To the Director' went unanswered/dismissed according to out dated statute. Stated rules/laws applied to granted patents and not pending application

- * The petition should have been handled by the Office but was not. Attorney Advisor stated in his decision dated 6/29/2017, that

'property rights in this application that can be canceled revoked or annulled only by proceedings that afford due process of law.'

- and that -

'An ex parte proceeding in the USPTO is not the appropriate forum for resolving a dispute concerning the ownership of an application.'

Applicant's Petition for Correction of Inventorship was not entered into the application file correctly

Applicant's Supplemental Declaration of Inventorship, filed with the Correction of Inventorship on 8/24/2015 was not entered into the application file correctly. The new declaration was supplied by the Applicant having the original oath invalid.

Applicant submits that changes to patent rules and statute law were mainstream during the same time as the Applicant's prosecution and other forwarding activities of the application by the Applicant. Applicant submits the patent's correct inventorship was, without question, first priority. Applicant, according to Edition 8, Revision 9, August 2012 rules and laws, proceeded to accumulate supporting evidence for the petition, having the date of the filing, that of August 24, 2015, at a time when Edition 9, Revision 11.2013 was in effect. The requirement in the previous edition for the signature of an inventor that is being deleted was no longer required in the later revision.

Applicant supplied required fees for the RCE (\$300 fee paid) and Revival (\$850 fee paid) petitions by 2/6/2016.

Applicant's petition for Correction of Inventorship should have been granted due to:

- 1) The signature is no longer required from the inventor being deleted.
- 2) Applicant submits that 37 C.F.R. §1.41(pre-AIA)(b) at the time of the filing of the petition indicated "applicant" refers to the inventor or joint inventor.

(b) Unless the contrary is indicated the word "applicant" when used in these sections refers to the inventor or joint inventors who are applying for a patent, or to the person mentioned in § 1.42, 1.43 or 1.47 who is applying for a patent in place of the inventor.
- 3) The petition was detailed, thorough and complete having the Office the ability to ask for additional information if necessary.
- 4) Applicant supplied information on Mr. Litsey to the Office in accordance to 37 C.F.R. §1.47.
- 5) In a pending application the Office decides inventorship issues.

35 U.S.C. § 116, in pertinent part, states: Whenever through error a person is named in an application for patent as the inventor, or through error an inventor is not named in an application, and such error arose without any deceptive intention on his part, the Director may permit the application to be amended accordingly

Applicant's Request Suspension of Rules under 37 C.F.R. §1.183 dated 8/8/2016 should have been granted as it is written the Director can waive requirements of the regulations can be suspended or waived.

Applicant filed, in some cases where due, extensions of time that were dismissed by the Office as to have been paid incorrectly.

Applicant has indicated and served as Owner, Registrant and the primary Applicant with all correspondence up to 4/7/2014 accepted by the Office while having only Applicant's signature.

Applicant submits that petitioning for a Correction of Inventorship and further the correction itself puts the granted patent at considerable risk of completely and

totally nullifying any prospectable reward of said granted patent if the inventorship is later incorrect.

35 U.S.C. § 256, in pertinent part, states:

Whenever through error a person is named in an issued patent as the inventor, or through error an inventor is not named in an issued patent and such error arose without any deceptive intention on his part, the Director may, on application of all the parties and assignees, with proof of the facts and such other requirements as may be imposed, issue a certificate correcting such error.

Applicant submits that the Correction of Inventorship petition should have been granted; thereafter Applicant would have continued as the sole Inventor and Applicant and thus revived and continued the '699 Application's prosecution earlier than the date of the Office's granting the application's revival with the "Decision On Petition" of 5/24/2018. (Note: A total of 1004 days exist from Applicant's 'Correction of Inventorship' petition filed August 24, 2015 and March 24, 2018, the granted Revival petition date and nearly all of the attributed Applicant delay of 1519 days in section 'iv' below, a total of 1508 days, exist between Applicant's first RCE and Revival petition date of April 7, 2014 and March 24, 2018, the granted Revival petition date.)

THEREFORE, given the above, Applicant submits the following for the attributed

Applicant delay(s):

Under 37 C.F.R. §1.704, the Office appears to have attributed 1959 total days of Applicant delay in six (6) separate sections. Applicant respectfully submits that the total Applicant delay should only be only 1108. The Applicant delay day count **difference** Applicant submits of 851 days comes from four (4) sections, those of i, ii, iv, and v, having each sections' difference identified with an arrow  and explained below.

-  (i) Under 37 C.F.R. §1.704(c)(6) the Office appears to have attributed 13 days of Applicant delay from 12/11/2020 (event #237) to 12/23/2020 (event #248) for when

‘Corrected Notice of Allowability’ was mailed. Applicant submits Applicant **should not** be attributed this delay as Applicant was submitting remaining items on previous IDS submissions and further the Office was still reviewing Applicant's petition filed 8/2/2020.

 (ii) Under 37 C.F.R. §1.704(c)(6) the Office appears to have attributed **17** days of Applicant delay from 9/29/2020 (event #231) to 10/15/2020 (event #233). Applicant submits Applicant **should not** be attributed this delay as the communication from the Office on 10/15/2020 was a notification by the examiner of the receipt of previously IDS submissions by Applicant.

(iii) Under 37 C.F.R. §1.704(b) the Office appears to have attributed **84** days of Applicant delay from 8/6/2018 (event #136) to 1/29/2019 (event #143) for Applicant's 'Response after Non-Final Action' to the Office's 'Mail Non-Final Rejection'.

(iv) Under 37 C.F.R. §1.704(c)(4) the Office appears to have attributed **1519** days of Applicant delay from 4/2/2013 (event #53) to 8/29/2017 (event #131). Applicant submits that the total amount of Applicant PTA delay days for this period, from 4/2/2013 to 8/29/2017, should be only **851** days, a difference of **668** days, for the following reason:

 From 6/29/2017 to 8/29/2017 Applicant had 2 months to respond to 6/29/2017 dismissal, taking 2 months time period to respond, therefore the **61** days during which time Applicant had to respond to the Dismissal of Applicant's ‘Waiver of Rules’ petition filed 8/8/2016 **should not** be attributed as Applicant delay.

 From 8/8/2016 to 6/29/2017, the Office took **311** days, which Applicant submits **should not** be attributed as Applicant delay, to respond to Applicant's ‘Petition for Waiver of Rules’ filed 8/8/2016.

From 3/7/2016 to 8/8/2016 Applicant submits had three (3) months to respond to 3/7/2016 dismissal⁴, according to 37 C.F.R. §1.704(b), taking 5 months' time period to respond, having paid for an 'Extension of Time' of three (3) months on 8/8/2016.⁵ Therefore Applicant submits the **92** days during which time Applicant had to respond to the 'Dismissal of Applicant's Correction of Inventorship' petition, filed 8/24/2015, **should not** be attributed as Applicant delay.

From 8/24/2015 to 3/7/2016 the Office took **196** days to respond with a decision on the 'Correction of Inventorship' petition filed 8/24/2015. Applicant had no course of action that could be taken to further prosecution or progression of the application during this time period. Applicant submits this time period **should not** be attributed as Applicant delay.⁶

Note: On 2/6/2016 Applicant filed 'Revival' petition (**\$850 fee paid**)

From 4/30/2014 to 8/24/2015, Applicant submits **481** days were days of Applicant's delay during which time Applicant prepared the 'Correction of Inventorship' petition filed 8/24/2015. This delay was due to the extensive amount of work done by Applicant in preparation of said petition.

From 4/7/2014 to 4/30/2014, the Office took **23** days that Applicant submits **should not** be attributed as Applicant delay to respond to Applicant's petition filed 4/7/2014.

⁴ The dismissed decision of 3/7/2016 stated the time for reply was 2 months. Applicant complied by that time period and an extended time period of three (3) months that was extended by petition of Applicant on 8/8/2016.

⁵ This is the extension where the Office of Petitions Attorney Advisor denied the Extension of Time Petition. Applicant admits the document submitted as the Extension Petition was a copy of a draft Applicant inadvertently submitted. The 1.183 Petition refers to Applicant's three (3) month Extension of Time. Fees paid were based on prior established 'Micro Entity' status certification.

⁶ A Petition to Revive was filed with fees paid of \$850 on 2/6/2016, a month prior to the Office's 3/7/2016 Decision. Applicant's Petition to Revive filed on 2/6/2016 was decided upon by the Office in the 3/7/2016. The Correction of Inventorship petition's decision rendering the application's inventorship had direct impact on future petitions filed by Applicant.

Note: On 4/7/2014 Applicant filed 'RCE' petition (**\$300 fee paid**) and 'Revival' petition (**\$35 fee paid**). Applicant submits that this was the only required fee for the Revival of 'Unavoidable' after researching and reviewing the applicable fee schedules current at that time point.

From 2/7/2014 to 4/7/2014, Applicant submits **59** days were days of Applicant's delay during which time Applicant prepared a response to the 'Notice of Abandonment' dated 2/7/2014.

From 10/18/2013 to 2/7/2014, Applicant submits **112** days were days of Applicant's delay due to circumstances that were out of Applicant's control having said circumstances both unavoidable as well as unintentional.

From 10/2/2013 to 10/18/2013, the Office took **16** days that Applicant submits **should not** be attributed as Applicant delay to respond with an 'Advisory Action' to Applicant's reply dated 10/2/2013.

From 4/2/2013 to 10/2/2013 Applicant had a 3 month period to reply to the 4/2/2013 'Final Rejection' and petitioned for a three (3) extension of time, making Applicant's delay 6 months. The first **91** days appears to be subtracted from this Applicant's delay section total of **1610** days dated from 4/2/2013 to 8/29/2017, resulting in the original **1519** days total the Office attributed Applicant in delay PTA days for this section.

Applicant submits, therefore, that for the time period from 4/2/2013 to 8/29/2017, Applicant's delay should be reduced by a total of **699** days, which is a total of (61+311+92+196+23+16).

(v) Under 37 C.F.R. §1.704(c)(3) the Office appears to have attributed **122** days of Applicant delay from dated 2/7/2014 (event #61) to 12/29/2017⁷ (event #66).

⁷The '699 Application had event #66 originally dated 4/7/2014. It is unsure to Applicant as to why the event's date has changed to a non-existent 'transaction date' value of 12/29/2017 .

Applicant submits Applicant **should not** be attributed this delay. This delay period overlaps Applicant's delay presented in section 'iv' above.⁸

- (vi) Under 37 C.F.R. §1.704(b) the Office appears to have attributed **204** days of Applicant delay from 3/6/2012 (event #36) to 12/27/2012 (event #47).

Within the above mentioned six (6) sections, the Office attributed a total of **1959** days whereas Applicant submits that the total day PTA delay attributed to Applicant should be **1108** days which is the difference of **851** days, a total of the **13** + **17** + **699** + **122** days indicated above in four (4) of the six (6) sections **should not** be attributed as Applicant delay.

Having the Office's 'Non-Overlapping USPTO Delays' day count total of **3535** days and submitted Applicant attributed day count total of **1108** days, the total PTA days for the '030 patent should be **2427** days.

Therefore, in view of the foregoing remarks, it is respectfully submitted that this request is granted to correct the Patent Term Adjustment of the '030 Patent to **2427** days and a certificate of correction be issued indicating the correct PTA calculation.

Applicant has included, for the filing of this petition, the fee set forth in 37 C.F.R. §1.18(e)

Thank you for your kind consideration and time with this correspondence.

Respectfully submitted,

/JohnLewisGuymonJr/

⁸ Applicant is unsure of the origin of this December 29, 2017 event and further as to why the event generates an attributed delay for Applicant that has overlapping dates and a day 'delay' value inconsistent with date day calculations.

ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment is 1576 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Application Assistance Unit (AAU) of the Office of Data Management (ODM) at (571)-272-4200.

Applicant's 'Letter Suggesting Miscellaneous Software Development Changes in Regard to the Listing of Inventor Name Suffixes'

January 12, 2021

Commissioner for Patents
Office of Data Management Attention: Certificates of Correction Branch
P.O. Box 1450
Alexandria, VA 22313-1450

Sir/ Madam:

On December 31, 2020, Applicant submitted a 'letter making error of record' specifying that the said error was that of the missing suffix notation on Applicant's listed name as an inventor. Upon further research Applicant has realized that the suffix on said inventor name might indeed be noted correctly in the file and that the error resides in the software application and/or web site development coding display of such.

With the display of inventor names in areas of the PAIR and PED systems as well as various documents that can become part of the application file, the inventor name(s) are shown but the related suffixes appear to be missing or not show. Some of the areas include the PAIR/PED application data tab and related 'all inventors' link as well as within filed application documents such as an 'EFS Acknowledgment Receipt' where the first name inventor/applicant is listed. Other areas not listed may also contain the display error.

Please accept Applicant's apology in his previous letter indicating a possible error on the Office's part, specifically that of Applicant's name suffix being absent of record. It is understood that if the said name suffix is part of the record and incorrectly displayed in various areas of the Office's electronic system that such error in indication may require time by the Office for fix and update and that in such time the suffix would remain visibly missing but part, in fact, of the record.

Thank you for your kind consideration and time with this correspondence.

Respectfully submitted,

/JohnLewisGuymonJr/

Commissioner for Patents
Office of Data Management Attention: Certificates of Correction Branch
P.O. Box 1450
Alexandria, VA 22313-1450

Sir/ Madam:

Comes now Applicant John Lewis Guymon Jr to request the Office correct an error in regard to listed inventor's name, specifically that of the missing suffix of said name, to wit: the 'Jr' indication.

Applicant, upon recent review of the Application file has noticed the error of exclusion of the named inventor's suffix, having said suffix of said inventors distinguished 'Junior' representation. The exclusion of the suffix has occurred only recently without indication and with reason unknown to Applicant.

The listing of the suffix has been indicated by Applicant since the initial filing date and has not been requested changed by Applicant during the complete prosecution period of the application. Further, Applicant has, during said prosecution, submitted three '3' ADS forms indicating and including said suffix. Applicant has always maintained the suffix and has not petitioned the Office for its removal. Finally, the initial 'Filing Receipt' dated January 13, 2009, the 'Updated Filing Receipt' dated March 27, 2009 and the 'Updated Filing Receipt' dated September 30, 2020 all properly indicate and include the said 'Jr' suffix.

The change to the inventors name suffix has been done by the Office without explanation. Applicant respectfully requests the Office update the inventor's name to include the said suffix 'Jr' and would appreciate greatly the change be made prior to patent issue and publication.

Thank you for your kind consideration and time with this correspondence.

Respectfully submitted,

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

**DECISION ON PETITION
UNDER 37 CFR §1.181**

This is a decision in response to the petition filed on August 2, 2020 under 37 C.F.R. § 1.181 requesting: “[r]econsideration of the review and confirmation, from the Director, of the Disclosure Documents, Patent Number references and Non-Patent Literature Information Disclosures submitted to and considered by the Office with indication into the application file #12/316,699.”

The petition is **Dismissed**.

Background

A review of the application file shows that:

- On the dates of December 15, 2008, April 3, 2009, August 20, 2010, January 10, 2012, January 20, 2012, September 6, 2012, December 27, 2012, December 26, 2019, and August 2, 2020 Information Disclosure Statements (IDS) were filed.
- On March 6, 2012 the Office mailed a Non-Final Office Action.
- On April 2, 2013 the Office mailed a Final Office Action.
- On August 23, 2019 the Office mailed a Notice of Allowance.
- On December 26, 2019 a Petition was filed.
- On May 20, 2020 the Office withdrew the present Application from issue.
- On June 2, 2020 the Office mailed an Ex Parte Quayle communication.
- On June 22, 2020 the Office mailed a Petition Decision on the Petition filed on December 26, 2019.
- On August 2, 2020, the Present Petition was filed together with a Response to the Ex Parte Quayle communication, and an IDS.
- On September 28, 2020 the Office mailed a Notice of Allowance.
- On October 15, 2020 the Office mailed a Miscellaneous Communication.

Relevant Rules, Statutes and Procedures

37 C.F.R. § 1.98, sets forth, in part:

(a) Any information disclosure statement filed under § 1.97 shall include the items listed in paragraphs (a)(1), (a)(2) and (a)(3) of this section.

(1) A list of all patents, publications, applications, or other information submitted for consideration by the Office. U.S. patents and U.S. patent application publications must be listed in a section separately from citations of other documents. Each page of the list must include:

(i) The application number of the application in which the information disclosure statement is being submitted;

(ii) A column that provides a space, next to each document to be considered, for the examiner's initials; and

(iii) A heading that clearly indicates that the list is an information disclosure statement.

(2) A legible copy of:

(i) Each foreign patent;

(ii) Each publication or that portion which caused it to be listed, other than U.S. patents and U.S. patent application publications unless required by the Office;

(iii) For each cited pending unpublished U.S. application, the application specification including the claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion ...; and

(iv) All other information or that portion which caused it to be listed.

(b)

(1) Each U.S. patent listed in an information disclosure statement must be identified by inventor, patent number, and issue date.

(2) Each U.S. patent application publication listed in an information disclosure statement shall be identified by applicant, patent application publication number, and publication date.

(3) Each U.S. application listed in an information disclosure statement must be identified by the inventor, application number, and filing date.

(4) Each foreign patent or published foreign patent application listed in an information disclosure statement must be identified by the country or patent office which issued the patent or published the application, an appropriate document number, and the publication date indicated on the patent or published application.

(5) Each publication listed in an information disclosure statement must be identified by publisher, author (if any), title, relevant pages of the publication, date, and place of publication.

MPEP § 609.04(a)(II), sets forth, in part:

Electronic means or medium for filing IDSs are not permitted except for: (A) citations to U.S. patents, U.S. patent application publications, foreign patent documents, and non-patent literature (NPLs) in an IDS filed via the Office's Electronic Filing System (EFS) (see MPEP § 609.07); or (B) a compact disc (CD) that has tables, sequence listings, or program listings included in a paper IDS in compliance with 37 CFR 1.52(e). A CD cannot be used to submit an IDS listing or copies of the documents cited in the IDS. For example, published information, such as the visual output of a software program or a video, may be submitted only if reduced to writing, such as in the form of screen shots and/or a transcript.

Decision

In the August 2, 2020 instant petition, Petitioner requests “[r]econsideration of the review and confirmation, from the Director, of the Disclosure Documents, Patent Number references and Non-Patent Literature Information Disclosures submitted to and considered by the Office with indication into the application file #12/316,699.”

The instant petition acknowledges at the beginning of the Statement of Facts that “Applicant’s ‘Disclosure Document’ program’s documents #610142 and #610141 were submitted by Applicant on 12/15/2008 and considered by the Examiner 3/6/2012.” Additionally, it is acknowledged that Applicant submitted copies of these Disclosure Documents on December 26, 2019. Since, the Examiner has considered Disclosure Document’ program’s documents #610142 and #610141, Petitioner’s request is **dismissed as moot** regarding this issue. For Petitioner’s convenience it is further noted that the USPTO discontinued the Disclosure Document Program on February 1, 2007. See, MPEP § 715.07(H).

As discussed in both the Ex Parte Quayle communication mailed on June 2, 2020 and Petition decision mailed on June 22, 2020, the Information Disclosure Statement filed on December 26, 2019 was not considered by the Examiner because many of the citations did not clearly identify the specific prior art documents being referenced. In particular, many of the citations did not comply with 37 C.F.R. § 1.98(b)(5) which requires that “[e]ach publication listed in an

information disclosure statement must be identified by publisher, author (if any), title, relevant pages of the publication, date, and place of publication.”

In response to the Ex Parte Quayle communication mailed on June 2, 2020, Applicant filed a “revised citation list” (hereinafter referred to as the IDS filed on August 2, 2020). Review of the Application file shows that the Office has reviewed the IDS filed on August 2, 2020. The Notice of Allowance mailed on September 28, 2020 noted that all references in the IDS filed on August 2, 2020 were considered except where lined through. The references that were lined through were all Non-Patent Literature citations. These Non-Patent Literature citations were not considered because copies of the references for those citations could not be located in the file. 37 C.F.R. § 1.98(a)(2) requires Applicant to submit a legible copy of “[e]ach publication or that portion which caused it to be listed, other than U.S. patents and U.S. patent application publications unless required by the Office.” As such, based on 37 C.F.R. § 1.98(a)(2), the Office acted properly in not considering the lined through references. Based on the foregoing, Petitioner’s request regarding the IDS filed on August 2, 2020 is **dismissed as moot** regarding all citations that have been considered in the Notice of Allowance mailed on September 28, 2020 and is **dismissed** regarding all citations that have been lined through as not considered.

It is noted that the IDS filed on August 2, 2020 appears to list many of the same citations that were previously submitted in other IDSs; however, the correspondence between the citations listed in the prior IDSs and the citations in the IDS filed on August 2, 2020 cannot be determined with complete certainty because the prior IDSs did not fully comply with 37 C.F.R. § 1.98. Specifically, as mentioned above, many of the previous citations did not clearly identify the specific prior art documents being referenced. Moreover, none of the cited Non-Patent Literature documents were properly submitted until December 26, 2019. Accordingly, all Non-Patent Literature citations prior to December 26, 2019 failed to comply with the requirements of 37 C.F.R. § 1.98(a)(2) and thus could not properly be considered by the Office.

Regarding the IDSs submitted on April 3, 2009 and August 20, 2010, it is noted that the Office considered all U.S. patent documents and U.S. patent application documents in those IDSs. However, per 37 C.F.R. § 1.98(a)(2), the Examiner properly did not consider any of the Non-Patent Literature that was cited. As discussed above, consideration of the Non-Patent Literature could not properly be accomplished, because none of the cited Non-Patent Literature documents were properly submitted until December 26, 2019. Similarly, the Non-Patent Literature in the January 10, 2012 and January 20, 2012 IDSs could not properly be considered for the same reason.¹ Based on the foregoing, Petitioner’s request regarding the IDSs filed on April 3, 2009,

¹ The Examiner’s most recent consideration of the IDSs filed on April 3, 2009 and August 20, 2010 is shown in the file on October 26, 2019. The file on October 26, 2019 shows that the Non-Patent Literature citations in those IDSs were lined through as not considered, since no copies of those citations were available. Similarly, the Examiner’s most recent consideration of the IDS filed on January 20, 2012 is shown in the file on October 31, 2019. Again, with regard to this IDS, the Non-Patent Literature citations were lined through as not considered, since no copied of those citations were available.

The file on November 8, 2019 indicates that the Examiner considered all references except where lined through in the IDS filed on January 10, 2012. However, the Examiner improperly indicated that the Non-Patent Literature citations in this IDS were considered, since the Examiner did not have copies of those citations. As such, the Non-Patent Literature in this IDS was not considered. To clarify the record the Examiner mailed a Miscellaneous

August 20, 2010, January 10, 2012, and January 20, 2012 is **dismissed as moot** regarding all citations that have been considered and **dismissed** regarding all citations that have been lined through as not considered.

Regarding the requirement to submit copies of Non-Patent Literature, Petitioner's discussion of references submitted via "CD content" and discussion of documents being available at URL: <http://www.Intelldoc.Com/npl> is acknowledged; however, "[e]lectronic means or medium for filing IDSs are not permitted except for ... citations to U.S. patents, U.S. patent application publications, foreign patent documents, and non-patent literature (NPLs) in an IDS filed via the Office's Electronic Filing System (EFS)." Quoting, MPEP § 609.04(a)(II) (emphasis added). It is noted that "[a] CD cannot be used to submit an IDS listing or copies of the documents cited in the IDS." Quoting, *Id.* (emphasis added). Thus, any Non-Patent Literature documents must be filed using either EFS or transmitted by facsimile with a certificate of transmission. For Petitioner's convenience, contact information for the USPTO's Patent Electronic Business Center (EBC) is provided below. The EBC assists customers with the various Patent Electronic Systems which include filing their electronic patent application submissions via the Electronic Filing System (EFS). The EBC can be contacted via phone number 866-217-9197 or email address ebc@uspto.gov. Further information about the EBC is available at: <https://www.uspto.gov/learning-and-resources/support-centers/patent-electronic-business-center>.

Regarding, Petitioner's statement that "Applicant's Information Disclosure statements of Patent Numbers and Non-Patent Literature, dated 9/6/2012, have yet to have any indication of consideration by Examiner." It is observed that the IDS filed on September 6, 2012 did not comply with 37 C.F.R. § 1.98(a)(2), because copies of the Non-Patent Literature cited were not submitted at the time that IDS was filed. Further, the IDS filed on September 6, 2012, did not comply with 37 C.F.R. § 1.98(b). The IDS filed on September 6, 2012 did not comply with 37 C.F.R. § 1.98(b), because it did not identify: (1) each U.S. patent "by inventor, patent number, and issue date"; (2) each U.S. patent application publication "by the inventor, application number, and filing date"; and (3) each Non-Patent Literature publication "by publisher, author (if any), title, relevant pages of the publication, date, and place of publication."

Although the IDS filed on September 6, 2012 did not comply with 37 C.F.R. § 1.98 and was not considered, the IDS filed on December 27, 2012, as best understood by the Office, lists the same U.S. patent and U.S. patent application publication documents. The IDS filed on December 27, 2012 was considered by the Examiner and included as an attachment to the Final Office action mailed on April 2, 2013. Additionally, the IDS filed on August 2, 2020, appears as best understood to cite the same Non-Patent Literature documents that were listed in the IDS filed on September 6, 2012. As discussed above, the IDS filed on August 2, 2020 was reviewed as indicated in the Notice of Allowance mailed on September 28, 2020.² Based on the foregoing, as

Communication on October 15, 2020 including a copy of the January 10, 2012 IDS with the Non-Patent Literature citations lined through as not considered, since no copies of those citations were available at the time the IDS was filed.

² Additionally, the Miscellaneous Communication mailed on October 15, 2020 included a copy of the September 6, 2012 IDS as treated by the Examiner.

best understood, in light of the Office's consideration of the IDSs filed on December 27, 2012 and August 2, 2020, all citations from the IDS filed on September 6, 2012, with the exception of those lined through as not considered in the Notice of Allowance mailed on September 28, 2020, have been considered by the Office at this time. Accordingly, Petitioners request regarding the IDS filed on September 6, 2012 is **dismissed as moot** regarding all citations that have been considered in other IDSs and is **dismissed** regarding any other citations, since the IDS filed on Sept. 6, 2012 did not comply with 37 C.F.R. § 1.98.

It is observed that the IDS filed on September 6, 2012 did not clearly identify the specific prior art documents being referenced. As such, the Office is using its best efforts and it is not possible to determine with complete certainty which Non-Patent Literature was previously cited in comparison to that cited and considered in the IDS filed on August 2, 2020. In view of this lack of clarity and certainty, Petitioner is in the best position to determine which if any references have not yet been considered by the Office. Petitioner is further advised to **fully review the timing requirements for filing an IDS** under 37 C.F.R. § 1.97 along with the IDS content requirements under 37 C.F.R. § 1.98. Further, Petitioner is encouraged to contact the Examiner regarding any questions related to the re-submission of any documents. Lastly, **Petitioner is encouraged to avoid re-submitting any IDS citations or copies of documents which have already been considered** by the Examiner.

It is noted that Petitioner's time to pay the issue fee for the Notice of Allowance mailed on September 28, 2020 continues to run. To avoid abandonment the Issue Fee must be paid within **three months** of the September 28, 2020 mail date.

Summary: The present petition is **Dismissed**. Specifically, the petition is **Dismissed as Moot** in regards to the 'Disclosure Document' program documents #610142 and #610141 and all references already considered in the IDSs filed by Applicant. The present petition is **Dismissed** in regards to any unconsidered references cited in the submitted IDSs, based on their non-compliance with 37 C.F.R. § 1.98.

Sir/ Madam:

As per an applicant/examiner interview discussion, herein included are the twenty-seven previously referenced non-patent literature resources, which upon the most recent review of September 28, 2020 were indicated as missing by the examiner and were therefore struck. It was determined that previous uploads failed due to embedded fonts, file name and/or security issues.

As directed by the examiner, these twenty-seven references are being supplied via EFS, having H275_HatzidakisWebServicesSecurityByExample alternatively accessible via <http://www.intellectoc.com/npl>, and indexed in a condensed citation list for confirmation of consideration and avoidance of redundancy.

Thank you for your consideration and time with this correspondence.

Respectfully submitted,

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

<i>Applicant-Initiated Interview Summary</i>	Application No. 12/316,699	Applicant(s) Guymon, John Lewis	
	Examiner KAVEH ABRISHAMKAR	Art Unit 3649	AIA (FITF) Status No

All participants (applicant, applicants representative, PTO personnel):

(1) Kaveh Abrishamkar. (3) _____.

(2) John Guymon. (4) _____.

Date of Interview: 02 November 2020.

Type: Telephonic Video Conference
 Personal [copy given to: applicant applicant's representative]

Exhibit shown or demonstration conducted: Yes No.
If Yes, brief description: _____.

Issues Discussed 101 112 102 103 Others
(For each of the checked box(es) above, please describe below the issue and detailed description of the discussion)

Claim(s) discussed: N/A.

Identification of prior art discussed: N/A.

Substance of Interview

(For each issue discussed, provide a detailed description and indicate if agreement was reached. Some topics may include: identification or clarification of a reference or a portion thereof, claim interpretation, proposed amendments, arguments of any applied references etc...)

The Examiner informed the Applicant that the Information Disclosure Statements filed on 9/6/2012 and 1/10/2012 were submitted for bookkeeping purposes and the references which were considered were included in the Notice of Allowance mailed on 9/28/2020.

Applicant recordation instructions: The formal written reply to the last Office action must include the substance of the interview. (See MPEP section 713.04). If a reply to the last Office action has already been filed, applicant is given a non-extendable period of the longer of one month or thirty days from this interview date, or the mailing date of this interview summary form, whichever is later, to file a statement of the substance of the interview.

Examiner recordation instructions: Examiners must summarize the substance of any interview of record. A complete and proper recordation of the substance of an interview should include the items listed in MPEP 713.04 for complete and proper recordation including the identification of the general thrust of each argument or issue discussed, a general indication of any other pertinent matters discussed regarding patentability and the general results or outcome of the interview, to include an indication as to whether or not agreement was reached on the issues raised.

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) 1.133 Interviews

Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiners responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicants correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,-
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicants record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiners version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, Interview Record OK on the paper recording the substance of the interview along with the date and the examiners initials.

UPDATED FILING RECEIPT

Date Mailed: 09/30/2020

Receipt is acknowledged of this non-provisional utility patent application. The application will be taken up for examination in due course. Applicant will be notified as to the results of the examination. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF FIRST INVENTOR, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection.

Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please submit a written request for a corrected Filing Receipt, including a properly marked-up ADS showing the changes with strike-through for deletions and underlining for additions. If you received a "Notice to File Missing Parts" or other Notice requiring a response for this application, please submit any request for correction to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections provided that the request is grantable.

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications:

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

IMPROPER SUBMISSION OF REQUEST UNDER 37 CFR 1.48(a)

The request under 37 CFR 1.48(a) (request to change inventorship) submitted on 09/28/2020 in the above-identified application is not accepted because:

- The request to correct inventorship under 37 CFR 1.48(a) is deficient because a corrected or updated application data sheet (ADS) in compliance with 37 CFR 1.76 (including markings showing the changes) has not been submitted. Any renewed request must include a corrected or updated ADS in compliance with 37 CFR 1.76 that identifies the information being changed, with underlining for insertions, and strike-through or brackets for text removed.

Questions about the contents of this notice and the requirements it sets forth should be directed to the Office of Data Management, Application Assistance Unit, at (571) 272-4000 or (571) 272-4200 or 1-888-786-0101.

To: **Commissioner for Patents**
P.O. Box 1450
Alexandria, VA 22313-1450

Applicant hereby requests that the inventorship be corrected or changed, or that the name of the inventor or a joint inventor, or the order of the names of joint inventors, be changed, in the above-identified application. **Note:** 37 CFR 1.48 applies to any request to correct inventorship filed on or after September 16, 2012, regardless of the application filing date. **Do not submit this form after payment of the issue fee or if the application has been patented.** See 37 CFR 1.324 for correction of inventorship in a patent.

Please check the applicable box(es) below.

For a nonprovisional application:

1. This request is to correct or change the inventorship in a **nonprovisional** application (under 37 CFR 1.48(a)) and includes:

An application data sheet (ADS) in accordance with 37 CFR 1.76(c) with the corrected or updated information shown with markings (e.g., underlining for insertions, strikethrough for deletions). See the Manual of Patent Examining Procedure (MPEP) section 601.05(a) for information about filing an ADS in an application filed on/after September 16, 2012. For information about filing a Supplemental ADS in an application filed before September 16, 2012, see MPEP 601.05(b).

The processing fee set forth in 37 CFR 1.17(i).

\$ 35

An inventor is being added. An inventor's oath or declaration by any actual inventor who has not yet executed an oath or declaration is required (see 37 CFR 1.48(b)). See MPEP 602.01(a) for information about an inventor's oath or declaration for an application filed on/after September 16, 2012 (e.g., form **PTO/AIA/01**). For information about an inventor's oath or declaration for an application filed before September 16, 2012 (e.g., form **PTO/SB/01**), see MPEP 602.01(b).

This request is being filed after the first Office action on the merits has been given or mailed (see 37 CFR 1.48(c) and 1.17(d)). Check one of the following:

This request to correct or change the inventorship is due solely to the cancellation of claims in the application.

OR

The fee set forth in 37 CFR 1.17(d) is due (in addition to the fee set forth in 37 CFR 1.17(i)).

Examiner Name	ABRISHAMKAR, KAVEH
Practitioner Docket Number	

To: Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Applicant hereby requests that the inventorship be corrected or changed, or that the name of the inventor or a joint inventor, or the order of the names of joint inventors, be changed, in the above-identified application. Note: 37 CFR 1.48 applies to any request to correct inventorship filed on or after September 16, 2012, regardless of the application filing date. Do not submit this form after payment of the issue fee or if the application has been patented. See 37 CFR 1.324 for correction of inventorship in a patent.

Please check the applicable box(es) below.

For a nonprovisional application:

1. This request is to correct or change the inventorship in a nonprovisional application (under 37 CFR 1.48(a)) and includes:

An application data sheet (ADS) in accordance with 37 CFR 1.76(c) with the corrected or updated information shown with markings (e.g., underlining for insertions, strikethrough for deletions). See the Manual of Patent Examining Procedure (MPEP) section 601.05(a) for information about filing an ADS in an application filed on/after September 16, 2012. For information about filing a Supplemental ADS in an application filed before September 16, 2012, see MPEP 601.05(b).

The processing fee set forth in 37 CFR 1.17(i).

\$ 35

An inventor is being added. An inventor's oath or declaration by any actual inventor who has not yet executed an oath or declaration is required (see 37 CFR 1.48(b)). See MPEP 602.01(a) for information about an inventor's oath or declaration for an application filed on/after September 16, 2012 (e.g., form PTO/AIA/01). For information about an inventor's oath or declaration for an application filed before September 16, 2012 (e.g., form PTO/SB/01), see MPEP 602.01(b).

This request is being filed after the first Office action on the merits has been given or mailed (see 37 CFR 1.48(c) and 1.17(d)). Check one of the following:

This request to correct or change the inventorship is due solely to the cancellation of claims in the application.

OR

The fee set forth in 37 CFR 1.17(d) is due (in addition to the fee set forth in 37 CFR 1.17(i)).

\$ 150

Sir/Madam:

Enclosed with this cover letter includes:

Statement Under 37 CFR 3.73(c) establishing right of assignee
Cover Sheet under 37 CFR 3.28 and 37 CFR 3.31, with supporting evidence of
chain title under 37 CFR 3.11,
Change of Correspondence Address,
Request for Correction in a Patent Application Relating to Inventorship or an
Inventor Name, or Order of Names, Other Than in a Reissue Application under 37
CFR 1.48, and applicable fee(s), and
Supplemental Application Data Sheet under 37 CFR 1.76

Comes now John Lewis Guymon Jr, as Inventor, Applicant, and Registered Agent and Owner of iBailBonding.Com, submits a statement under 37 CFR 3.73(c) to establish the right of the assignee to take action on the prosecution of above listed patent application, as he is assignee of the entire right, title, and interest under Utah Code 34-39-3(2), enforceable with written negotiations/contract mediation, See Reese v. Tingey v. LWP Claims Solutions.

Documentary evidence of a chain of title from the original owner to the assignee is being submitted for recordation pursuant to 37 CFR 3.11 through employment confidentiality and non-disclosure agreement, entered on 4/29/2006, between iBailBonding.Com and Douglas Scott Litsey. The statement and recordation form cover sheet is signed by a person having apparent authority, John Lewis Guymon Jr, Registered Owner of iBailBonding.Com.

Signed by a person having apparent authority, John Lewis Guymon Jr, Registered Owner of iBailBonding.Com, Applicant and Assignee, with responsibility for correcting inventorship in compliance with 37 CFR 1.48 when the application is amended to change the claims so that one (or more) of the named inventors is no longer an inventor of the subject matter of a claim remaining in the application, files this request under 37 CFR 1.48, being filed on or after September 16, 2012,

Requests for correction of inventorship under 37 CFR 1.48 filed on or after September 16, 2012 will be handled by the Office of Patent Application Processing (OPAP).

pursuant to 35 U.S.C. 116, where under 37 CFR 1.48 this request to correct or change the inventorship is due to an amended claim set and the canceling of claims in the application related to Mr. Litsey's 'GLE' user specified additional sectional components, a functional use of the inscribed invention and not an inventive concept of the 12/316,699 application. Note: The amendment of claims also fixed incorrectly misplaced character text sectional components data types.

Also included herein is a Supplemental Application Data Sheet (ADS) in accordance to 37 CFR 1.76, with strike-through for deletions, processing fee set forth in 37 CFR 1.17(i), and, if as needed for 37 CFR 1.48 correction, the processing fee set forth in 37 CFR 1.17(d). A Supplemental Oath or Declaration, with supporting exhibits, under 37 CFR 1.67 was previously filed on 8/24/2015.

Thank you for your consideration and time with this correspondence.

Respectfully submitted,

/JohnLewisGuymonJr/

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

TITLE OF INVENTION: Securable independent electronic document

Table with 7 columns: APPLN. TYPE (nonprovisional), ENTITY STATUS (MICRO), ISSUE FEE DUE (\$250), PUBLICATION FEE DUE (\$0.00), PREV. PAID ISSUE FEE (\$250.00), TOTAL FEE(S) DUE (\$0), DATE DUE (12/28/2020)

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies. If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above. If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)". For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. More information is available at www.uspto.gov/PatentMaintenanceFees.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

- (2) John Lewis Guymon Jr.. (4) ____.

Date of Interview: 20 August 2020.

Type: Telephonic Video Conference
 Personal [copy given to: applicant applicant's representative]

Exhibit shown or demonstration conducted: Yes No.
If Yes, brief description: ____.

Issues Discussed 101 112 102 103 Others
(For each of the checked box(es) above, please describe below the issue and detailed description of the discussion)

Claim(s) discussed: N/A.

Identification of prior art discussed: N/A.

Substance of Interview

(For each issue discussed, provide a detailed description and indicate if agreement was reached. Some topics may include: identification or clarification of a reference or a portion thereof, claim interpretation, proposed amendments, arguments of any applied references etc...)

The Applicant called and inquired about the status of the application. The Examiner notified the Applicant that there is a pending petition.

Applicant recordation instructions: The formal written reply to the last Office action must include the substance of the interview. (See MPEP section 713.04). If a reply to the last Office action has already been filed, applicant is given a non-extendable period of the longer of one month or thirty days from this interview date, or the mailing date of this interview summary form, whichever is later, to file a statement of the substance of the interview.

Examiner recordation instructions: Examiners must summarize the substance of any interview of record. A complete and proper recordation of the substance of an interview should include the items listed in MPEP 713.04 for complete and proper recordation including the identification of the general thrust of each argument or issue discussed, a general indication of any other pertinent matters discussed regarding patentability and the general results or outcome of the interview, to include an indication as to whether or not agreement was reached on the issues raised.

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) 1.133 Interviews

Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiners responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicants correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,-
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicants record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiners version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, Interview Record OK on the paper recording the substance of the interview along with the date and the examiners initials.

August 2, 2020,

Dear Director, Sir or Madam:

Now, with respect and appreciation, comes John Lewis Guymon Jr., Applicant, petitioning for reconsideration of the United States Patent and Trademark Office, under 37 C.F.R. §1.181(a)(3), petition to the Under Secretary of Commerce for Intellectual Property and Director ('Director') of the United States Patent and Trademark Office ('Office'), in response to the Ex Parte Quayle Action, dated 6/2/2020 and Petition Decision, dated 6/22/2020, for the review and confirmation by the Director of this application's Disclosure Document and Information Disclosure considerations.

Applicant includes a response to the Ex Parte Quayle Action by way of the inclusion of a revised citation list.

STATEMENT OF FACTS

Applicant's 'Disclosure Document' program's documents #610142 and #610141 were submitted by Applicant on 12/15/2008 and considered by the Examiner 3/6/2012.

Applicant's Information Disclosure Statements filed on 4/3/2009, 8/20/2010, 1/10/2012, 1/20/2012, containing Applicant's U.S. Patent Documents list and Non-Patent Literature Documents list, were considered by the Examiner with Notice of Non-Final Office Action dated 3/6/2012. Applicant's Non-Patent Literature content referenced was submitted by Applicant on 8/20/2010 ('12316699SA), 1/10/2012 ('1231669UA') and 1/20/2012 ('12316699ZA').

Applicant's U.S. Patent Documents list was supplied by Applicant on 12/27/2012 and considered by Examiner by Notice of Final Office Action dated 4/02/2013, and are part of the electronic application file record.

The application file contains all Document Disclosure and Non-Patent Literature content.

On 12/15/2008 Applicant submitted Disclosure Documents #610142 and #610141

On 4/3/2009, 8/20/2010, 1/10/2012, and 1/20/2012 Applicant submitted Information Disclosure statements of Patent Numbers, referenced Non-Patent Literature and supporting files via CD content

On 3/6/2012, Examiner considered all previously submitted Information Disclosure items, that of Document Disclosure, Patent Numbers, and Non-Patent Literature, via first Non-Final Office Action

On 9/6/2012, Applicant submitted both an Information Disclosure statement of Patent Numbers and Non-Patent Literature as part of Applicant's Arguments/Remarks Made in an Amendment

On 11/27/2012, the Office sent Notice to the applicant regarding a non-compliant or non-responsive amendment

On 12/27/2012, Applicant submitted updated Information Disclosure statement of Patent Numbers after Notice to the applicant regarding a non-compliant or non-responsive amendment

On 4/2/2013, Examiner considered the updated Information Disclosure statement of Patent Numbers submitted by Applicant on 12/27/2012, having the Information Disclosure statement of Non-Patent Literature, submitted by Applicant on 9/6/2012, without indication of consideration

- On 8/23/2019, the Office mailed a Notice of Allowance and Fees Due
- On 10/26/2019, Examiner entered Information Disclosure statements of Patent Numbers, dated 3/31/2009 and 8/14/2010, and Non-Patent Literature, dated 3/31/2009 and 8/17/2010, all having been previously considered 3/02/2012
- On 10/31/2019, Examiner entered Information Disclosure statements of Non-Patent Literature, dated 1/7/2012, having been previously considered 3/02/2012
- On 11/08/2019, Examiner entered Information Disclosure statements of Non-Patent Literature, dated 1/2/2012, having been previously considered 3/02/2012
- On 11/21/2019, Examiner entered Information Disclosure statement of Patent Numbers and Non-Patent Literature, submitted by Applicant 9/6/2012, without indication of consideration
- On 11/22/2019, Applicant submitted Issue Fee Payment
- On 11/27/2019, Applicant phoned Examiner and discussed Information and Document Disclosure considerations
- On 12/26/2019, Applicant supplied Disclosure Documents' content, Patent Number list, Non-Patent Literature references and citation list to the application file via fax and EFS submission #38143537
- On 12/26/2019, Applicant filed 1.181 petition for confirmation of the consideration of all Disclosure Documents and Information Disclosure statements
- On 5/20/2020, the Office withdrew the Application from issue
- On 6/02/2020, the Office mailed an Ex Parte Quayle communication
- On 6/22/2020, the Office mailed a Decision on Petition
- On 07/27/2020, Applicant supplied Non-Patent Literature references (Qty 30) to the file via EFS submission #40105741
- On 07/28/2020, Applicant supplied Non-Patent Literature references (Qty 1) to the file via EFS submission #40125384

Applicant, on 12/26/2019, supplied Disclosure Document and Non-Patent Literature references to confirm their inclusion in the application file. Upon further review, Applicant identified a number of Non-Patent Literature references that were inadvertently omitted, due to their file type (PDF portfolio requiring separation) and/or security features, in the 12/26/2019 EFS submission. Applicant subsequently entered a number of the aforementioned Non-Patent Literature references, on 7/27/2020 and 7/28/2020, into the application the file via EFS submissions.

References may no longer be available or located for public viewing, nor may they be of their 'original' form as of the date referenced. Changes to the referenced material may include titling or description, web site availability or changes, article date or version updates or content alterations. Applicant has therefore included reference for download of all 'Non-Patent Literature' in PDF or original file form at the following URL: <http://www.Intellego.com/npl> .

Applicant's relevant Non-Patent Literature references (a total count of 706) are included within and part of the application file and are available in PDF file type form as recognized and uploaded by the Office's EFS system. Further, the Non-Patent Literature reference item 'H275', 'H275_HatzidakisWebServicesSecurityByExample.pdf', is unable to be submitted through the Office's EFS system, yet may be retrieved from the URL listed above.

Applicant, with this request for reconsideration, has submitted an updated citation list that includes all relevant data fields of the Non-Patent Literature references submitted on Applicant's Information Disclosure statement submissions of 2012 and prior. The updated citation list has been further filtered to remove duplicates or other non-pertinent references. All Non-Patent Literature items are designated by the citation number and original data file name.

Applicant believes now this reconsideration request will resolve the Office's dismissed petition dated June 22, 2020. Applicant has included an updated citation list in response to the Ex Parte Quayle Office Action dated June 2, 2020. All action points of said examiner's Office action have been resolved.

POINTS FOR REVIEW

Applicant, in his part in duty, of candor, for disclosure as per Rule 56 (37 C.F.R. §1.56) presents all Information and Disclosure Documents and Non-Patent Literature document contents. Applicant has engaged in reasonable efforts to conclude processing or examination of the Application, and further reserves the right to respond to any allegation of prior art and take appropriate action to establish the patentability of the disclosed invention over the listed documents, should one or more of the documents be applied against the claims of the present application.

Applicant, with due diligence, believing to be in compliance with 37 C.F.R. §1.97 and 37 C.F.R. §1.98 made multiple bona-fide attempts to supply all prior-art information and disclosure. Information and Document Disclosures were submitted in accordance to 37 C.F.R. §1.97(b)(3), prior to the mailing of the first Office Action on the Merits (FOAM), included Non-Patent Literature references, and were considered on the date of said mailing March 6, 2012.

Applicant submitted the Non-Patent Literature references and a descriptive documents list, via CDs containing excel spreadsheets, presented with hash checksums for verification, as well as filesizes and dates of generation and/or archive, with respect for the Office's system security and safety. **All Non-Patent Literature references and related information are of Information Disclosure statement submissions of 2012 or prior.**

Applicant's Information Disclosure statements of Patent Numbers and Non-Patent Literature, dated 9/6/2012, have yet to have any indication of consideration by Examiner.

During an Applicant initiated interview, on 11/27/2019, Applicant and Examiner discussed Information and Document Disclosure considerations.

The 1.181 petition, filed on 12/26/2019, was in response to examiner's entries of Applicant's previous, submitted and/or considered Information Disclosures statements, for confirmation of the consideration of all Information and Document Disclosures.

ACTION REQUESTED

Reconsideration of the review and confirmation, from the Director, of the Disclosure Documents, Patent Number references and Non-Patent Literature Information Disclosures submitted to and considered by the Office with indication into the application file #12/316,699.

Applicant kindly, with respect, asks the Director for further assistance. Thank you.

Respectfully submitted,

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

**DECISION ON PETITION
UNDER 37 CFR §1.181**

This is a decision in response to the petition filed on December 26, 2019 under 37 C.F.R. § 1.181 requesting “[r]eview and confirmation into the file from the Director of the Disclosure Documents and Information Disclosures submitted and considered to the Office with indication into application file #12/316,699.”

The petition is **DISMISSED**.

STATEMENT OF FACTS

- On the dates of December 15, 2008, April 3, 2009, August 20, 2010, January 10, 2012, and January 20, 2012 Information Disclosure Statements were filed.
- On March 6, 2012 the Office mailed a Non-Final Office Action.
- On August 23, 2019 the Office mailed a Notice of Allowance.
- On December 26, 2019 the instant Petition was filed.
- On May 20, 2020 the Office withdrew the present Application from issue.
- On June 2, 2020 the Office mailed an Ex Parte Quayle communication.

DECISION

In the December 26, 2019 instant petition, Petitioners request “[r]eview and confirmation into the file from the Director of the Disclosure Documents and Information Disclosures submitted and considered to the Office with indication into [the] application file.” (12/26/2019, Petition, p. 3).

The March 6, 2012 Non-Final Office Action indicated that the Disclosure Documents and Information Disclosure Statements filed on December 15, 2008, April 3, 2009, August 20, 2010, January 10, 2012, and January 20, 2012 were considered by the Examiner. A review of the file reveals that copies of the Disclosure Documents and Non-Patent Literature from the Information Disclosure Statements filed on December 15, 2008, April 3, 2009, August 20, 2010, January 10, 2012, and January 20, 2012 were not yet entered into the Application File at the time of the March

6, 2012 Non-Final Office Action. Petitioners likewise state that the “‘Disclosure Document’ files and Non-Patent Literature content has yet to be entered into the electronic application file.” (12/26/2019, Petition, p. 2).

The instant Petition was filed on December 26, 2019 and included an Information Disclosure Statement, copies of the Disclosure Documents, and copies of numerous Non-Patent Literature references. Petitioners state that the included Disclosure Documents and Non-Patent Literature references are submitted “in copy of their original form, to aid in confirmation of their containment and inclusion in the application file.” (12/26/2019, Petition, p. 2).

The Information Disclosure Statement filed on December 26, 2019 was not considered by the Examiner because many of the citations did not clearly identify the specific prior art documents being referenced. (6/2/2020, Ex Parte Quayle, p. 2). In this regard, it was not possible to readily determine how each respective submitted Non-Patent Literature document corresponds with a specific entry on the Information Disclosure Statement. The June 2, 2020, Ex Parte Quayle communication provided an explanation of the corrections needed to the Information Disclosure Statement. Making the needed corrections will allow the Office to determine how each respective submitted Non-Patent Literature document corresponds with its specific entry on the Information Disclosure Statement. Additionally, Petitioners are encouraged to contact the Examiner to schedule a telephonic interview if they have any questions regarding how to make the necessary corrections.

This Petition is being **DISMISSED**, since it is not presently possible to readily determine how each respective submitted Non-Patent Literature document corresponds with each specific entry on the Information Disclosure Statement. However, the decision will be held in abeyance pending Petitioner’s response to the Ex Parte Quayle communication.

Review and confirmation into the file of the Disclosure Documents and Information Disclosures will be completed upon Petitioners’ submission of a compliant Information Disclosure Statement in response to the Ex Parte Quayle communication. Petitioners may renew this petition pending the outcome of the Examiner’s consideration of Petitioners’ response to the Ex Parte Quayle Communication.

The TWO (2) MONTH shortened statutory period from the June 2, 2020 mailing of the Ex Parte Quayle communication continues to run.

Summary: The petition is **DISMISSED**.

Any questions regarding this decision should be directed to Joseph Rocca at 571-272-5191.

Notice of Pre-AIA or AIA Status

The present application is being examined under the pre-AIA first to invent provisions.

Quayle Action

1. This action is in response to the Information Disclosure Statement (IDS) filed on December 26, 2019.

2. This application is in condition for allowance except for the following formal matters:

The Information Disclosure Statement (IDS) filed on December 26, 2019 is not proper. Many of the citations on the IDS are improper as they do not clearly identify the prior art being referenced.

For each Non-Patent Literature (NPL) document being references, the Applicant should list the: Author(s), Title of the Article, Title of the item (book, magazine, journal, serial, symposium, catalog, etc.), data, page(s), volume-issue number(s), publisher, city and/or country where published. In some cases, all of these may not be applicable, but information must be provided to allow retrieval of the document(s).

Examples of improper citations include: C013 (provides only a Title), D0026 (provides only a Title), D027 (Provides no definite information), D033 (provides a Title only), E018 (Provides only a Title), F001, F002, F003, F004, F005, F006, F018 (all provide incomplete information), F031 (provides a possible Title), F052 (Provides a possible Title but unclear), F733-F737 (all provide incomplete information), H133-H149 (all provide incomplete information), H174 (only states "Document File Format" which is ambiguous and provides no information), H269 (States "google translate pdf" which provides no definite information), H358-374 (all provide PDFs without any other information), H591-H592 (appear to list

Patent Publications but unclear. U.S. Patent Publications should be listed in another section of the IDS under U.S. Patent Application Publications), M034 (merely state "Security Whitepapers" without anything else), Y007 (merely states fips_186-3.pdf without any other information). This list is not exhaustive as there are multiple other citations that do not meet the criteria for a proper citation.

There is an available web-fillable form for IDS. The link is provided below:

https://www.uspto.gov/sites/default/files/patents/process/file/efs/guidance/updated_IDS.pdf

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KAVEH ABRISHAMKAR whose telephone number is (571)272-3786. The examiner can normally be reached on M-F 9-5:30.

Examiner interviews are available via telephone, in-person, and video conferencing using a USPTO supplied web-based collaboration tool. To schedule an interview, applicant is encouraged to use the USPTO Automated Interview Request (AIR) at <http://www.uspto.gov/interviewpractice>.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Hodge can be reached on 571-272-2097. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Sir / Madam:

In response to the ' Notice to File Corrected Application Papers dated (mailed) October 24, 2019, with an extension of time of two (2) months filed December 23, 2019 having an EFS ID #38125518 / RAM confirmation Number #E2019BMF58168492 making reply date due on or before February 24, 2020, Applicants hereby amends the Application of Patent, 12/316699, filed December 15, 2008 and remarks as follows:

Amendments to the Specification begin on page **2** of this paper.

Amendments to the Drawings begin on page **7** of this paper and include both an attached replacement sheet and an annotated sheet showing changes.

Remarks/Arguments begin on page **8** of this paper.

Amendments to the Specification:

Please replace paragraph [0093] with the following amended paragraph.

[0093] ~~Rewrite~~ The present invention can be embodied in various forms, including business processes, computer implemented methods, computer program products, computer systems and networks, user interfaces, application programming interfaces, and the like.

Please replace paragraph [0096] with the following amended paragraph.

[0096] Applications are not putting options in for a major embedded section of character text.

Please replace paragraph [0107] with the following amended paragraph.

[0107] The problem with securities assets transfer required solid positive control of ~~container~~ container for such assets. Not until now has there been a container with enhanced security containing both automated data and visual presentation.

Please replace paragraph [0138] with the following amended paragraph.

[0138] ~~FIGS. FIGS. 1A~~ through ~~1EE~~ are block diagrams illustrating an embodiment. ~~FIG. FIG. 1A~~ is a block diagram of one embodiment in accordance with the present invention. ~~FIGS. FIGS. 1B~~ through ~~1EE~~ are block diagrams of sections within the embodiment.

Please replace paragraph [0139] with the following amended paragraph.

[0139] ~~FIG-FIG. 2~~ is a schematic diagram illustrating some of the types of files, if any, that may be enveloped within an embodiment.

Please replace paragraph [0160] with the following amended paragraph.

[0160] One embodiment as illustrated in **FIG. 1A**, **100** has any User File **130** or none at all inside a [XML] markup file **120** and **140** enveloped by a [PNG] graphics file **110** and **150**. In **FIGS. 1A** through ~~1E~~, XML and PNG are shown as the markup and graphics files respectively, although in certain embodiments, other choices may exist for both. Either or both the [XML] markup file and the [PNG] graphics file may have intrinsic security features [CRC's]. As an example, **FIG. 1F** shows a typical arrangement of a PNG data block or chunk with some data elements **191** through **195** and the security feature **196** at the end of the chunk. In the case of the PNG format, the data security feature takes the form of a cyclic redundancy check or CRC computed on the contents of that data chunk. In this and other file formats, other kinds, numbers, and placements of intrinsic and constructed security features may occur. Naturally, it is appreciated that variations are possible and considered within the scope of the example and embodiments.

Please replace paragraph [0161] with the following amended paragraph.

[0161] In certain embodiments, either or both the [XML] markup file and the [PNG] graphics file may include zero or more Digital Signatures and /-or Counter-Signatures of various forms. **FIGS. 1B** and **1C** show as an example, typical PNG file header and file end sections respectively. In the case of the PNG file format, the structure of the file is quite flexible with regards to occurrence, number, and arrangement of data blocks or chunks after the IHDR chunk ~~111 (FIG. 1B)~~~~FIG-1B-111~~ and before the IEND chunk ~~159 (FIG. 1C)~~ ~~FIG-1C-159~~.

Continuation with an example of a use of the PNG file format in an embodiment, the markup

language file and user file component, if any user files are included at all, may be inserted in zero or more ~~Z~~zTXI chunks 113 (FIG. 1B) FIG-1B-113 and / or 155 (FIG. 1C) FIG-1C-155; and / or zero or more ~~EXT-EXI~~ chunks 114 (FIG. 1B) FIG-1B-114 and / or 153 (FIG. 1C) FIG-1C-153; and / or zero or more ~~EXT-TXI~~ chunks 115 (FIG. 1B) FIG-1B-115 and / or 154 (FIG. 1C) FIG-1C-154; and / or zero or more IDAT chunks 117 (FIG. 1B) FIG-1B-117 and / or 151 (FIG. 1C) FIG-1C-151; and / or zero or more Other Sections 116 (FIG. 1B) FIG-1B-116 and / or 152 (FIG. 1C) FIG-1C-152. In various embodiments, Digital Signatures 112 (FIG. 1B) FIG-1B-112 may be added before the included data. In other embodiments, Digital Signatures 156 (FIG. 1C) FIG-1C-156 may be added near the end of the graphics file. Still other embodiments may have Digital Signatures 112 (FIG. 1B) FIG-1B-112 and 156 (FIG. 1C) FIG-1C-156 both before and after the included file or no Digital Signatures at all in the graphics file portion.

Please replace paragraph [0163] with the following amended paragraph.

[0163] The PNG file structure permits the inclusion ~~FIG-1B-113-116 and FIG-1C-152-155~~ of several types of text data blocks or chunks and other optional types of data chunks 113-116 (FIG. 1B) and 152-155 (FIG. 1C) in a file. Many of these kinds of data chunks are quite flexible as to what is precisely put into them. Various embodiments could place into these chunks information concerning advanced security features, encryption, digital rights, and / or other uses. In an example of a use of the PNG specification as the graphics file in an embodiment, the ~~FIG-1B-117 and FIG-1C-151~~ IDAT chunks 117 (FIG. 1B) and 151 (FIG. 1C) could also carry information concerning advanced security features, encryption, digital rights; and / or other uses as well. Furthermore, an embodiment that uses the PNG specification may also contain user created chunks fabricated within the rules of the specification for the purposes of advanced security, encryption, digital rights; and / or other uses as well as the pre-described chunk types.

Please replace paragraph [0165] with the following amended paragraph.

[0165] The markup file may also contain ~~FIG-1D,122 and FIG-1E,141~~ optional sections and / or files 122 (FIG. 1D) and 141 (FIG. 1E). An embodiment could use these data to support any combination of advanced security, encryption, digital rights, non-repudiation (e.g., evidencing that a document was signed by a particular entity at a particular date and time), field validation (e.g., checking that information in a document complies with content category rules); and / or other uses as appropriate. In the case of the XML, the W3C maintains routines to convert 8 bit data to 6 bit data and the inverse conversion 6 bit to 8 bit data with no losses of bits. These conversion routines may facilitate the inclusion of files within the markup portion of an embodiment although other conversion routines may be appropriate for certain applications.

Please replace paragraph [0166] with the following amended paragraph.

[0166] When an originator has completed a securable independent electronic document, they may have access to several kinds of information they included and, perhaps, beyond what they put in. For their particular instance of an embodiment, there may exist zero or more files, CRCs', basic and / or advanced security features, encryption data, digital rights, digital signatures, notarizations; and other data.

Please replace paragraph [0167] with the following amended paragraph.

[0167] ~~Additional embodiments of the securable independent electronic document, FIG-X and Xa show an electronic document using could be created using~~ some of the combinations above. For instance, with the 'Power of Attorney' electronic document, ~~shown in Fig-X a method of the securable independent electronic document generation can include both visual graphic image as well as digitally signed character text information population, 100 has the graph 80, the text section 5, and data populating~~
AMk0224j.doc

Please replace paragraph [0195] with the following amended paragraph.

[0195] Although the description above contains many specificities, these should not be construed as limiting the scope of the embodiments but as merely providing illustrations of some of the presently preferred embodiments. ~~For example, the document can have other purposes, such as,~~
ect.

Please replace paragraph [0197] with the following amended paragraph.

[0197] It is understood that the above-described embodiments are only illustrative of the application of the principles of the present Securable Independent Electronic Document ~~ELECTRONIC DOCUMENT~~ apparatus taught within. The electronic document may be embodied in other specific forms without departing from its spirit or essential characteristics. The described embodiments are to be considered in all respects only as illustrative and not restrictive. The scope of the document apparatus is, therefore, indicated by the appended claims rather than by the foregoing descriptions. All changes, which come within the meaning and range of equivalency of the claims, are to be embraced within their scope.

Amendments to the Drawings:

The attached sheets replace this application's drawing #1/2 and include changes to Figures 1B and 1C. These 2 (two) sheets, one a replacement sheet labeled "**Replacement Sheet**" with the changes made in black and one annotated sheet labeled "**Annotated Sheet Showing Changes**" showing such changes, include Figures 1A thru 1F and replaces the original drawing sheet that included the same said included figures.

REMARKS:

In response to the 'Notice to File Corrected Application Papers' office action dated October 24, 2019, Applicants, with this reply, present the following remarks to address the two (2) inconsistencies listed in the said action's 'IDENTIFICATION OF SPECIFICATION/DRAWING INCONSISTANCIES'.

In regard to Item #1 (checked paragraph #2), '*The drawings filed...*', the specification's paragraph [0138] in the ' BRIEF DESCRIPTION OF THE DRAWINGS' section has been amended and now describes Figure 1F.

In regard to Item #2 (checked paragraph #6), '*Page 26-27 of the specification ...*' the specification's paragraph's [0160], [0161], [0163], [0165] and [0167] in the ' DETAILED DESCRIPTION—FIRST EMBODIMENT—FIGS. 1' section has been amended and now correctly describes and references the various figures / elements listed in the office action's 'COMMENTS' item. Paragraph [0167] removes an incorrectly referenced figure.

Additionally, the specification's paragraph's [0093], [0096], [0107], [0139], [0166], [0195] and [0197] have been amended to correct simple editorial errors or grammar mistakes for proper disclosure and require no substantial amount of additional work on the part of the Office.

Amendment to Drawing '1/2' Figures 1B and 1C correct various nomenclatures used in the naming of PNG ancillary chunks.

CONCLUSION:

Applicants submit that the specification and drawings are now in proper form, and that the Application is now in complete and proper condition for issue..

If for any reason this application is not in full condition for allowance/issue after the consideration of this reply to the 'NOTICE TO FILE CORRECTED APPLICATION PAPERS' office action dated 10/24/2019, Applicants respectfully request the Office give notice to Applicants accordingly.

Respectfully submitted,

NOTICE TO FILE CORRECTED APPLICATION PAPERS

Notice of Allowance Mailed

This application has been accorded an Allowance Date and is being prepared for issuance. The application, however, is incomplete for the reasons below.

Applicant is given two (2) months from the mail date of this Notice within which to respond. This time period for reply is extendable under 37 CFR 1.136(a) for only TWO additional MONTHS.

The informalities requiring correction are indicated in the attachment(s). If the informality pertains to the abstract, specification (including claims) or drawings, the informality must be corrected with an amendment in compliance with 37 CFR 1.121 (or, if the application is a reissue application, 37 CFR 1.173). Such an amendment may be filed after payment of the issue fee if limited to correction of informalities noted herein. See Waiver of 37 CFR 1.312 for Documents Required by the Office of Patent Publication, 1280 Off. Gaz. Patent Office 918 (March 23, 2004). In addition, if the informality is not corrected until after payment of the issue fee, for purposes of 35 U.S.C. 154(b)(1)(iv), "all outstanding requirements" will be considered to have been satisfied when the informality has been corrected. A failure to respond within the above-identified time period will result in the application being ABANDONED.

See attachment(s).

*A copy of this notice **MUST** be returned with the reply. Please address response to

Application No. 12316699

IDENTIFICATION OF SPECIFICATION/DRAWING INCONSISTENCIES

- On Page of the specification there is a brief description of FIG. , but the drawings filed do not include a drawing with that designation. Applicant must respond either by supplying the omitted drawing or by amending the specification to remove all references to that drawing.
- The drawings filed 12/17/2008 include FIG. 1E, but the specification's brief description of the drawings does not describe a drawing with that designation. Applicant must respond either by amending the specification to add a brief description of that drawing or by correcting the drawings to remove the drawing in question.
- In the utility application, drawings are present in the application and are referred to in the detailed description of the invention, but the specification does not contain a brief description of the several views as required by 37 CFR 1.74 and 37 CFR 1.77(b)(9).
- The design application does not contain a description of the figure or figures of the drawing as required by 37 CFR 1.153(a) and 37 CFR 1.154(b)(4).
- In the plant application, the specification does not contain a brief description of the drawing as required by 37 CFR 1.163(c)(8).
- Page 26-27 of the specification refers to FIG. see below, but no drawing with that designation is described in the brief description of the drawings and no drawing with that designation is present in the application. Applicant must respond either by amending the specification to remove all references to that drawing, or by supplying that drawing and amending the specification to add a brief description of it.
- In the reissue application, FIG. , is labeled as "New" but is not described in the reissue specification's brief description of the drawings. Applicant must respond by amending the reissue specification's brief description of the drawings to add a brief description of the new drawing.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

PETITION TO THE DIRECTOR
UNDER
37 CFR §1.181(a)(3)

December 26, 2019

Under Secretary of Commerce for Intellectual Property and Director of
The United States Patent And Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Now, with respect and appreciation, comes John Lewis Guymon Jr., Applicant, petitioning the United States Patent And Trademark Office, under 37 C.F.R. §1.181(a)(3), petition to the Under Secretary of Commerce for Intellectual Property and Director ('Director') of the United States Patent and Trademark Office ('Office'), for review and confirmation by the Director of this application's Information Disclosures' considerations in accordance to Examiner's '1449' filings dated 3-06-2012 and recent filings, within the last 2 months, of October and November.

To assist the Office's Examiner ('Examiner') in entering into the application file, Applicant has attached 'Disclosure Document's content and Non-Patent Literature.

STATEMENT OF FACTS

Applicant's 'Disclosure Document' program's documents #610142 and #610141 were submitted by Applicant on 12/15/2008 and considered by the Examiner 3/6/2012.

Applicant's Information Disclosure statements filed on 4/3/2009, 8/20/2010, 1/10/2012, 1/20/2012, containing Applicant's U.S. Patent Documents list and Non-Patent Literature Documents list, were considered by the Examiner with Notice of Non-Final Office Action dated 3/6/2012. Applicant's Non-Patent Literature content referenced, was submitted by Applicant on 8/20/2010 ('12316699SA'), 1/10/2012 ('1231669UA') and 1/20/2012 ('12316699ZA').

The 'Disclosure Document' files and Non-Patent Literature content has yet to be entered into the electronic application file, and are therefore included by Applicant now, in copy of their original form, to aid in confirmation of their containment and inclusion in the application file.

Applicant's U.S. Patent Documents list was supplied by Applicant on 12/27/2012 and considered by Examiner by Notice of Final Office Action dated 4/02/2013 are part of the electronic application file record.

Applicant, with due diligence, believing to be in compliance with 37 C.F.R. §1.97 and 37 C.F.R. §1.98 made multiple bona-fide attempts to supply all prior-art information and disclosure.

POINTS FOR REVIEW

Information Disclosures were submitted in accordance to 37 C.F.R. §1.97(b)(3), prior to the mailing of the first Office action on the merits (FOAM) and were considered on the date of said mailing March 6, 2012.

Applicant submitted the Non-Patent Literature and a descriptive documents list, via excel spreadsheets presented, with hash checksums for verification, as well as filesizes and dates of generation and/or archive, with respect for system security and safety.

Applicant, in his part in duty, of candor, for disclosure as per Rule 56 (37 C.F.R. §1.56) present this Disclosure Document and Non-Patent Literature document contents.

During an Applicant initiated interview, on 11/27/2019, Applicant and Examiner discussed the Patent Documents and Non-Patent Literature accepted, referenced and considered by the Examiner, along with the remaining references pending final review.

ACTION REQUESTED

Review and confirmation into the file from the Director of the Disclosure Documents and Information Disclosures submitted and considered to the Office with indication into application file #12/316,699.

Applicants kindly, with respect, asks the Director for assistance. Thank you.

Respectfully submitted,

/JohnLewisGuymonJr/

Conception

Date of conception:

02/01/2006

Circumstances Of Conception:

Derived from original eSuretyBailBond document conception.

Previous Disclosure of Conception:

Internal company discussion with 'Non-Disclosure / Confidentiality' agreement.

Purposes And Advantages Of Invention:

Needed single document. I established link between graphic and xml and designed it initially for the eSuretyBailBond. The IntellEDoc became the base document for the processing of electronic documents that contain both data formats.

The following understand, have witnessed, and agree not to disclose the above confidential information. Signed and dated this Saturday, December 16, 2006.

Description:

The IntellEDoc is a base design for an electronic document that is a single data file that supports complete eCommerce document processing. The document is able to be easily created, distributed, viewed, achieved and reviewed at any time without a third party software or intervention required. Further document or internal digital signature verification is possible for document security.

Construction:

The IntellEDoc is a generic electronic document container that allows customization of visual and XML data set creation.

Sketches:

Visual document is shown here. The actual text and/or graphics can be anything and would represent the XML data equivalent.

Operation:

An application can be developed for data collection and graphic processing that incorporates the data via XML text inside the physical graphic image. Further, the XML data can be easily extracted for processing, verification or other usage. The document can include an internal verification process as well as an external hash verification process that allows the document to be verified in both directions from vendor to recipient and back again.

Ramifications:

The creation of a single file document that serves the two data presentation purposes of both visual as well as XML data processing allows simple and secure eCommerce transactions. Simple, secure operation is possible along with dual direction hash value verification for document authenticity purposes. The size and format of the IntelLEDoc document is the smallest possible for the data contained and is ready for archive and retrieval needs.

Novel features:

The IntelLEDoc is the simplest form of an electronic document that contains both visual as well as XML data. The document is completely secure with dual direction verification. Additionally, the document can contain digital signatures for eCommerce support. Transactional processing and history can also be incorporated within the document structure.

Conception

Date of conception:

09/09/2002.

Circumstances Of Conception:

Needed for single document processing in the software application suite that was under development during the time.

Previous Disclosure of Conception:

Internal company discussion with 'Non-Disclosure / Confidentiality' agreement.

Purposes And Advantages Of Invention:

Needed single document. Established surety power of attorney legality ability in electronic document. Separated base electronic document and created IntelLEDoc concept.

Description:

Based upon the IntellEDoc principle, the eSuretyBailBond is a surety bail bond document in electronic form containing eCommerce capabilities for both an Insurance company's Power of Attorney and DOJ GJXDM data model support. The eSuretyBailBond is IntellEDoc based electronic document that includes digitally signed notarized XML data sets supporting the Surety and Bail Bonding Industries as well as the Department Of Justice's data sharing technologies. The eSuretyBailBond offers extensive security for Financial and Legal industry and complies with the latest data requirements of the Federal Government.

Construction:

Originally created for bail bonding industry, the construction has become simplified and standardized by way of the IntellEDoc process. Further, the eSuretyBailBond confirms to the latest technological standards for XML processing for the Department of Justice's bond document processing.

Operation:

An application can be developed for an IntelLEDoc based multilevel document that incorporates both a surety Power Of Attorney document as well as a bonding company's execution of a bail bond attached to the surety Power Of Attorney. Both IntelLEDoc based documents can become one combined document that contains multiple XML data elements.

Ramifications:

The bail bond process needs a process that corrects the legal creation of bond creation and distribution. The attributes of the IntelLEDoc based document makes the eSuretyBailBond the best process available for the industry. Online Electronic Surety Bail Bond Process – The dynamic environment of electronic document creation combined with the electronic delivery of the surety insured bail bond allows new industry operations for improved handling, secured processing, and immediate control of the bail bond document.

Novel features:

The eSuretyBailBond is the first bail bond document that is in electronic format containing digital signatures and notarization possibilities. Further, the XML data is in the standards proposed by the Department Of Justice in the GJXDM definition.

<i>Applicant-Initiated Interview Summary</i>	Application No. 12/316,699	Applicant(s) Guymon et al.	
	Examiner KAVEH ABRISHAMKAR	Art Unit 3649	AIA (FITF) Status No

All participants (applicant, applicants representative, PTO personnel):

(1) Kaveh Abrishamkar. (3) ____.

(2) John Guymon. (4) ____.

Date of Interview: 27 November 2019.

Type: Telephonic Video Conference
 Personal [copy given to: applicant applicant's representative]

Exhibit shown or demonstration conducted: Yes No.
If Yes, brief description: ____.

Issues Discussed 101 112 102 103 Others
(For each of the checked box(es) above, please describe below the issue and detailed description of the discussion)

Claim(s) discussed: N/A.

Identification of prior art discussed: N/A.

Substance of Interview

(For each issue discussed, provide a detailed description and indicate if agreement was reached. Some topics may include: identification or clarification of a reference or a portion thereof, claim interpretation, proposed amendments, arguments of any applied references etc...)

Applicant inquired about the non-considered references on the Information Disclosure Statement (IDS).

Applicant recordation instructions: The formal written reply to the last Office action must include the substance of the interview. (See MPEP section 713.04). If a reply to the last Office action has already been filed, applicant is given a non-extendable period of the longer of one month or thirty days from this interview date, or the mailing date of this interview summary form, whichever is later, to file a statement of the substance of the interview.

Examiner recordation instructions: Examiners must summarize the substance of any interview of record. A complete and proper recordation of the substance of an interview should include the items listed in MPEP 713.04 for complete and proper recordation including the identification of the general thrust of each argument or issue discussed, a general indication of any other pertinent matters discussed regarding patentability and the general results or outcome of the interview, to include an indication as to whether or not agreement was reached on the issues raised.

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) 1.133 Interviews

Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiners responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicants correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,-
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicants record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiners version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, Interview Record OK on the paper recording the substance of the interview along with the date and the examiners initials.

NOTICE TO FILE CORRECTED APPLICATION PAPERS

Notice of Allowance Mailed

This application has been accorded an Allowance Date and is being prepared for issuance. The application, however, is incomplete for the reasons below.

Applicant is given two (2) months from the mail date of this Notice within which to respond. This time period for reply is extendable under 37 CFR 1.136(a) for only TWO additional MONTHS.

The informalities requiring correction are indicated in the attachment(s). If the informality pertains to the abstract, specification (including claims) or drawings, the informality must be corrected with an amendment in compliance with 37 CFR 1.121 (or, if the application is a reissue application, 37 CFR 1.173). Such an amendment may be filed after payment of the issue fee if limited to correction of informalities noted herein. See Waiver of 37 CFR 1.312 for Documents Required by the Office of Patent Publication, 1280 Off. Gaz. Patent Office 918 (March 23, 2004). In addition, if the informality is not corrected until after payment of the issue fee, for purposes of 35 U.S.C. 154(b)(1)(iv), "all outstanding requirements" will be considered to have been satisfied when the informality has been corrected. A failure to respond within the above-identified time period will result in the application being ABANDONED.

See attachment(s).

*A copy of this notice **MUST** be returned with the reply. Please address response to "Mail Stop Issue Fee, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450".*

IDENTIFICATION OF SPECIFICATION/DRAWING INCONSISTENCIES

- On Page of the specification there is a brief description of FIG. , but the drawings filed do not include a drawing with that designation. Applicant must respond either by supplying the omitted drawing or by amending the specification to remove all references to that drawing.
- The drawings filed 12/17/2008 include FIG. 1E, but the specification's brief description of the drawings does not describe a drawing with that designation. Applicant must respond either by amending the specification to add a brief description of that drawing or by correcting the drawings to remove the drawing in question.
- In the utility application, drawings are present in the application and are referred to in the detailed description of the invention, but the specification does not contain a brief description of the several views as required by 37 CFR 1.74 and 37 CFR 1.77(b)(9).
- The design application does not contain a description of the figure or figures of the drawing as required by 37 CFR 1.153(a) and 37 CFR 1.154(b)(4).
- In the plant application, the specification does not contain a brief description of the drawing as required by 37 CFR 1.163(c)(8).
- Page 26-27 of the specification refers to FIG. see below, but no drawing with that designation is described in the brief description of the drawings and no drawing with that designation is present in the application. Applicant must respond either by amending the specification to remove all references to that drawing, or by supplying that drawing and amending the specification to add a brief description of it.
- In the reissue application, FIG. , is labeled as "New" but is not described in the reissue specification's brief description of the drawings. Applicant must respond by amending the reissue specification's brief description of the drawings to add a brief description of the new drawing.

NOTICE TO FILE CORRECTED APPLICATION PAPERS

Notice of Allowance Mailed

This application has been accorded an Allowance Date and is being prepared for issuance. The application, however, is incomplete for the reasons below.

Applicant is given two (2) months from the mail date of this Notice within which to respond. This time period for reply is extendable under 37 CFR 1.136(a) for only TWO additional MONTHS.

The informalities requiring correction are indicated in the attachment(s). If the informality pertains to the abstract, specification (including claims) or drawings, the informality must be corrected with an amendment in compliance with 37 CFR 1.121 (or, if the application is a reissue application, 37 CFR 1.173). Such an amendment may be filed after payment of the issue fee if limited to correction of informalities noted herein. See Waiver of 37 CFR 1.312 for Documents Required by the Office of Patent Publication, 1280 Off. Gaz. Patent Office 918 (March 23, 2004). In addition, if the informality is not corrected until after payment of the issue fee, for purposes of 35 U.S.C. 154(b)(1)(iv), "all outstanding requirements" will be considered to have been satisfied when the informality has been corrected. A failure to respond within the above-identified time period will result in the application being ABANDONED.

See attachment(s).

*A copy of this notice **MUST** be returned with the reply. Please address response to

IDENTIFICATION OF SPECIFICATION/DRAWING INCONSISTENCIES

- On Page of the specification there is a brief description of FIG. , but the drawings filed do not include a drawing with that designation. Applicant must respond either by supplying the omitted drawing or by amending the specification to remove all references to that drawing.
- The drawings filed 12/17/2008 include FIG. 1E, but the specification's brief description of the drawings does not describe a drawing with that designation. Applicant must respond either by amending the specification to add a brief description of that drawing or by correcting the drawings to remove the drawing in question.
- In the utility application, drawings are present in the application and are referred to in the detailed description of the invention, but the specification does not contain a brief description of the several views as required by 37 CFR 1.74 and 37 CFR 1.77(b)(9).
- The design application does not contain a description of the figure or figures of the drawing as required by 37 CFR 1.153(a) and 37 CFR 1.154(b)(4).
- In the plant application, the specification does not contain a brief description of the drawing as required by 37 CFR 1.163(c)(8).
- Page 26-27 of the specification refers to FIG. see below, but no drawing with that designation is described in the brief description of the drawings and no drawing with that designation is present in the application. Applicant must respond either by amending the specification to remove all references to that drawing, or by supplying that drawing and amending the specification to add a brief description of it.
- In the reissue application, FIG. , is labeled as “New” but is not described in the reissue specification’s brief description of the drawings. Applicant must respond by amending the reissue specification’s brief description of the drawings to add a brief description of the new drawing.

12/316,699 12/15/2008 John Lewis Guymon JR. 1800

TITLE OF INVENTION: Securable independent electronic document

Table with 7 columns: APPLN. TYPE, ENTITY STATUS, ISSUE FEE DUE, PUBLICATION FEE DUE, PREV. PAID ISSUE FEE, TOTAL FEE(S) DUE, DATE DUE
nonprovisional MICRO \$250 \$0.00 \$0.00 \$250 11/25/2019

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.
If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.
If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".
For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. More information is available at www.uspto.gov/PatentMaintenanceFees.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), by mail or fax, or via EFS-Web.

By mail, send to: Mail Stop ISSUE FEE
 Commissioner for Patents
 P.O. Box 1450
 Alexandria, Virginia 22313-1450

By fax, send to: (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Identification of prior art discussed: N/A.

Substance of Interview

(For each issue discussed, provide a detailed description and indicate if agreement was reached. Some topics may include: identification or clarification of a reference or a portion thereof, claim interpretation, proposed amendments, arguments of any applied references etc...)

The Applicant discussed that there was a marked-up copy of the claims on record. The Examiner considered those amendments and will conduct a further search to determine allowability.

Applicant recordation instructions: The formal written reply to the last Office action must include the substance of the interview. (See MPEP section 713.04). If a reply to the last Office action has already been filed, applicant is given a non-extendable period of the longer of one month or thirty days from this interview date, or the mailing date of this interview summary form, whichever is later, to file a statement of the substance of the interview.

Examiner recordation instructions: Examiners must summarize the substance of any interview of record. A complete and proper recordation of the substance of an interview should include the items listed in MPEP 713.04 for complete and proper recordation including the identification of the general thrust of each argument or issue discussed, a general indication of any other pertinent matters discussed regarding patentability and the general results or outcome of the interview, to include an indication as to whether or not agreement was reached on the issues raised.

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) 1.133 Interviews Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiners responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicants correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,-
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicants record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiners version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, Interview Record OK on the paper recording the substance of the interview along with the date and the examiners initials.

TITLE OF INVENTION: Securable independent electronic document

Table with 7 columns: APPLN. TYPE (nonprovisional), ENTITY STATUS (MICRO), ISSUE FEE DUE (\$250), PUBLICATION FEE DUE (\$0.00), PREV. PAID ISSUE FEE (\$0.00), TOTAL FEE(S) DUE (\$250), DATE DUE (11/25/2019)

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies. If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above. If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)". For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. More information is available at www.uspto.gov/PatentMaintenanceFees.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), by mail or fax, or via EFS-Web.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) 1.133 Interviews

Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiners responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicants correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,-
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicants record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiners version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, Interview Record OK on the paper recording the substance of the interview along with the date and the examiners initials.

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Advisory Action Before the Filing of an Appeal Brief	Application No. 12/316,699	Applicant(s) Guymon et al.	
	Examiner KAVEH ABRISHAMKAR	Art Unit 3649	AIA (FITF) Status No

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 26 July 2019 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

NO NOTICE OF APPEAL FILED

1. The reply was filed after a final rejection. No Notice of Appeal has been filed. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114 if this is a utility or plant application. Note that RCEs are not permitted in design applications. The reply must be filed within one of the following time periods:

- a) The period for reply expires 3 months from the mailing date of the final rejection.
- b) The period for reply expires on: (1) the mailing date of this Advisory Action; or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.
- c) A prior Advisory Action was mailed more than 3 months after the mailing date of the final rejection in response to a first after-final reply filed within 2 months of the mailing date of the final rejection. The current period for reply expires _____ months from the mailing date of the prior Advisory Action or SIX MONTHS from the mailing date of the final rejection, whichever is earlier.

Examiner Note: If box 1 is checked, check either box (a), (b) or (c). ONLY CHECK BOX (b) WHEN THIS ADVISORY ACTION IS THE FIRST RESPONSE TO APPLICANTS FIRST AFTER-FINAL REPLY WHICH WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. ONLY CHECK BOX (c) IN THE LIMITED SITUATION SET FORTH UNDER BOX (c). See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) or (c) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37CFR 41.37(a).

AMENDMENTS

3. The proposed amendments filed after a final rejection, but prior to the date of filing a brief, will not be entered because
- a) They raise new issues that would require further consideration and/or search (see NOTE below);
- b) They raise the issue of new matter (see NOTE below);
- c) They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
- d) They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: See amended claim 1 (See 37CFR 1.116 and 41.33(a)).

4. The amendments are not in compliance with 37CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).
5. Applicants reply has overcome the following rejection(s): _____
6. Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
7. For purposes of appeal, the proposed amendment(s): (a) will not be entered, or (b) will be entered, and an explanation of how the new or amended claims would be rejected is provided below or appended.

AFFIDAVIT OR OTHER EVIDENCE

8. A declaration(s)/affidavit(s) under 37 CFR 1.130(b) was/were filed on _____
9. The affidavit or other evidence filed after final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e).
10. The affidavit or other evidence filed after the date of filing the Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing of good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).
11. The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

REQUEST FOR RECONSIDERATION/OTHER

12. The request for reconsideration has been considered but does NOT place the application in condition for allowance because:
13. Note the attached Information Disclosure Statement(s). (PTO/SB/08) Paper No(s). _____
14. Other: PTO-2323 attached.

STATUS OF CLAIMS

15. The status of the claim(s) is (or will be) as follows:
- Claim(s) allowed: _____
- Claim(s) objected to: _____
- Claim(s) rejected: 1-4.
- Claim(s) withdrawn from consideration: _____

This is in response to the After Final Consideration Pilot request filed 26 July 2019.

1. **Improper Request** – The AFCP 2.0 request is improper for the following reason(s) and the after final amendment submitted with the request will be treated under pre-pilot procedure.

- An AFCP 2.0 request form PTO/SB/434 (or equivalent document) was not submitted.
- A non-broadening amendment to at least one independent claim was not submitted.
- A proper AFCP 2.0 request was submitted in response to the most recent final rejection.
- Other: See Continuation Sheet

2. Proper Request

A. After final amendment submitted with the request will not be treated under AFCP 2.0.

The after final amendment cannot be reviewed and a search conducted within the guidelines of the pilot program.

- The after final amendment will be treated under pre-pilot procedure.

B. Updated search and/or completed additional consideration.

The examiner performed an updated search and/or completed additional consideration of the after final amendment within the time authorized for the pilot program. The result(s) of the updated search and/or completed additional consideration are:

- 1. All of the rejections in the most recent final Office action are overcome and a Notice of Allowance is issued herewith.
- 2. The after final amendment would not overcome all of the rejections in the most recent final Office action. See attached interview summary for further details.
- 3. The after final amendment was reviewed, and it raises a new issue(s). See attached interview summary for further details.
- 4. The after final amendment raises new issues, but would overcome all of the rejections in the most recent final Office action. A decision on determining allowability could not be made within the guidelines of the pilot. See attached interview summary for further details, including any newly discovered prior art.
- 5. Other: _____

Examiner Note: Please attach an interview summary when necessary as described above.

Continuation of Improper Request- Other: The amendment to the claims are non-compliant because there are no underlines or strikethroughs demonstrating which amendments were made to the claims.

Notice of Non-Compliant Amendment (37 CFR 1.121)

Application No. 12/316,699	Applicant(s) Guymon et al.	
Examiner KAVEH ABRISHAMKAR	Art Unit 3649	AIA (FITF) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

The amendment document filed on 07/26/2019 is considered non-compliant because it has failed to meet the requirements of 37 CFR 1.121 or 1.4. In order for the amendment document to be compliant, correction of the following item(s) is required.

THE FOLLOWING MARKED (X) ITEM(S) CAUSE THE AMENDMENT DOCUMENT TO BE NON-COMPLIANT:

- 1. Amendments to the specification:
 - A. Amended paragraph(s) do not include markings.
 - B. New paragraph(s) should not be underlined.
 - C. Other _____ .
- 2. Abstract:
 - A. Not presented on a separate sheet. 37 CFR 1.72.
 - B. Other _____ .
- 3. Amendments to the drawings:
 - A. The drawings are not properly identified in the top margin as "Replacement Sheet", "New Sheet", or "Annotated Sheet" as required by 37 CFR 1.121(d).
 - B. The practice of submitting proposed drawing correction has been eliminated. Replacement drawings showing amended figures, without markings, in compliance with 37 CFR 1.84 are required.
 - C. Other _____ .
- 4. Amendments to the claims:
 - A. A complete listing of all of the claims is not present.
 - B. The listing of claims does not include the text of all pending claims (including withdrawn claims)
 - C. Each claim has not been provided with the proper status identifier, and as such, the individual status of each claim cannot be identified. Note: the status of every claim must be indicated after its claim number by using one of the following status identifiers: (Original), (Currently amended), (Canceled), (Previously presented), (New), (Not entered), (Withdrawn) and (Withdrawn-currently amended).
 - D. The claims of this amendment paper have not been presented in ascending numerical order.
 - E. Other: See Continuation Sheet .
- 5. Other (e.g., the amendment is unsigned or not signed in accordance with 37 CFR 1.4):

For further explanation of the amendment format required by 37 CFR 1.121, see MPEP § 714.

TIME PERIODS FOR FILING A REPLY TO THIS NOTICE:

1. Applicant is given **no new time period** if the **non-compliant amendment is an after-final amendment** or an amendment filed after allowance. If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the **entire corrected amendment** must be resubmitted.
2. Applicant is given **two months** from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a *Quayle* action. If any of above boxes 1. to 4. are checked, the correction required is only the **corrected section** of the non-compliant amendment in compliance with 37 CFR 1.121.

Extensions of time are available under 37 CFR 1.136(a) only if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action.

Failure to timely respond to this notice will result in:

Abandonment of the application if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action; or

Non-entry of the amendment if the non-compliant amendment is a preliminary amendment or supplemental amendment.

/KAVEH ABRISHAMKAR/
Primary Examiner, Art Unit 3649

Continuation of 4(e) Other: The amendment to the claims are non-compliant because there are no underlines or strikethroughs demonstrating which amendments were made to the claims.

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Advisory Action Before the Filing of an Appeal Brief	Application No. 12/316,699	Applicant(s) Guymon et al.	
	Examiner KAVEH ABRISHAMKAR	Art Unit 3649	AIA (FITF) Status No

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 26 July 2019 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

NO NOTICE OF APPEAL FILED

1. The reply was filed after a final rejection. No Notice of Appeal has been filed. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114 if this is a utility or plant application. Note that RCEs are not permitted in design applications. The reply must be filed within one of the following time periods:

a) The period for reply expires 3 months from the mailing date of the final rejection.

b) The period for reply expires on: (1) the mailing date of this Advisory Action; or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

c) A prior Advisory Action was mailed more than 3 months after the mailing date of the final rejection in response to a first after-final reply filed within 2 months of the mailing date of the final rejection. The current period for reply expires _____ months from the mailing date of the prior Advisory Action or SIX MONTHS from the mailing date of the final rejection, whichever is earlier.

Examiner Note: If box 1 is checked, check either box (a), (b) or (c). ONLY CHECK BOX (b) WHEN THIS ADVISORY ACTION IS THE FIRST RESPONSE TO APPLICANTS FIRST AFTER-FINAL REPLY WHICH WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. ONLY CHECK BOX (c) IN THE LIMITED SITUATION SET FORTH UNDER BOX (c). See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) or (c) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37CFR 41.37(a).

AMENDMENTS

3. The proposed amendments filed after a final rejection, but prior to the date of filing a brief, will not be entered because

a) They raise new issues that would require further consideration and/or search (see NOTE below);

b) They raise the issue of new matter (see NOTE below);

c) They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or

d) They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: See amended claim 1 (See 37CFR 1.116 and 41.33(a)).

4. The amendments are not in compliance with 37CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).

5. Applicants reply has overcome the following rejection(s): _____

6. Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).

7. For purposes of appeal, the proposed amendment(s): (a) will not be entered, or (b) will be entered, and an explanation of how the new or amended claims would be rejected is provided below or appended.

AFFIDAVIT OR OTHER EVIDENCE

8. A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____

9. The affidavit or other evidence filed after final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e).

10. The affidavit or other evidence filed after the date of filing the Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellants fails to provide a showing of good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).

11. The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

REQUEST FOR RECONSIDERATION/OTHER

12. The request for reconsideration has been considered but does NOT place the application in condition for allowance because: _____

13. Note the attached Information *Disclosure Statement(s)*. (PTO/SB/08) Paper No(s). _____

14. Other: PTO-2323 attached.

STATUS OF CLAIMS

15. The status of the claim(s) is (or will be) as follows:
 Claim(s) allowed: _____
 Claim(s) objected to: _____
 Claim(s) rejected: 1-4.
 Claim(s) withdrawn from consideration: _____

This is in response to the After Final Consideration Pilot request filed 26 July 2019.

1. **Improper Request** – The AFCP 2.0 request is improper for the following reason(s) and the after final amendment submitted with the request will be treated under pre-pilot procedure.

- An AFCP 2.0 request form PTO/SB/434 (or equivalent document) was not submitted.
- A non-broadening amendment to at least one independent claim was not submitted.
- A proper AFCP 2.0 request was submitted in response to the most recent final rejection.
- Other: See Continuation Sheet

2. **Proper Request**

A. After final amendment submitted with the request will not be treated under AFCP 2.0.

The after final amendment cannot be reviewed and a search conducted within the guidelines of the pilot program.

- The after final amendment will be treated under pre-pilot procedure.

B. Updated search and/or completed additional consideration.

The examiner performed an updated search and/or completed additional consideration of the after final amendment within the time authorized for the pilot program. The result(s) of the updated search and/or completed additional consideration are:

- 1. All of the rejections in the most recent final Office action are overcome and a Notice of Allowance is issued herewith.
- 2. The after final amendment would not overcome all of the rejections in the most recent final Office action. See attached interview summary for further details.
- 3. The after final amendment was reviewed, and it raises a new issue(s). See attached interview summary for further details.
- 4. The after final amendment raises new issues, but would overcome all of the rejections in the most recent final Office action. A decision on determining allowability could not be made within the guidelines of the pilot. See attached interview summary for further details, including any newly discovered prior art.
- 5. Other: _____

Examiner Note: Please attach an interview summary when necessary as described above.

Continuation of Improper Request- Other: The amendment to the claims are non-compliant because there are no underlines or strikethroughs demonstrating which amendments were made to the claims.

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

The amendment document filed on 07/26/2019 is considered non-compliant because it has failed to meet the requirements of 37 CFR 1.121 or 1.4. In order for the amendment document to be compliant, correction of the following item(s) is required.

THE FOLLOWING MARKED (X) ITEM(S) CAUSE THE AMENDMENT DOCUMENT TO BE NON-COMPLIANT:

- 1. Amendments to the specification:
 - A. Amended paragraph(s) do not include markings.
 - B. New paragraph(s) should not be underlined.
 - C. Other _____ .
- 2. Abstract:
 - A. Not presented on a separate sheet. 37 CFR 1.72.
 - B. Other _____ .
- 3. Amendments to the drawings:
 - A. The drawings are not properly identified in the top margin as "Replacement Sheet", "New Sheet", or "Annotated Sheet" as required by 37 CFR 1.121(d).
 - B. The practice of submitting proposed drawing correction has been eliminated. Replacement drawings showing amended figures, without markings, in compliance with 37 CFR 1.84 are required.
 - C. Other _____ .
- 4. Amendments to the claims:
 - A. A complete listing of all of the claims is not present.
 - B. The listing of claims does not include the text of all pending claims (including withdrawn claims)
 - C. Each claim has not been provided with the proper status identifier, and as such, the individual status of each claim cannot be identified. Note: the status of every claim must be indicated after its claim number by using one of the following status identifiers: (Original), (Currently amended), (Canceled), (Previously presented), (New), (Not entered), (Withdrawn) and (Withdrawn-currently amended).
 - D. The claims of this amendment paper have not been presented in ascending numerical order.
 - E. Other: See Continuation Sheet .
- 5. Other (e.g., the amendment is unsigned or not signed in accordance with 37 CFR 1.4):

For further explanation of the amendment format required by 37 CFR 1.121, see MPEP § 714.

TIME PERIODS FOR FILING A REPLY TO THIS NOTICE:

1. Applicant is given **no new time period if the non-compliant amendment is an** after-final amendment or an amendment filed after allowance. If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the **entire corrected amendment** must be resubmitted.
2. Applicant is given **two months** from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a *Quayle* action. If any of above boxes 1. to 4. are checked, the correction required is only the **corrected section** of the non-compliant amendment in compliance with 37 CFR 1.121.

Extensions of time are available under 37 CFR 1.136(a) only if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action.

Failure to timely respond to this notice will result in:

Abandonment of the application if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action; or

Non-entry of the amendment if the non-compliant amendment is a preliminary amendment or supplemental amendment.

Sir Madam:

In response to the Final Office Action dated April 26th, 2019, Applicants respectfully submit this APCA amendment to the Application of Patent, #13316699, filed December 15th, 2008. This response is filed within the three month period for reply of the mailing date of the Final Office Action, wherefore Applicants believe that no extension of time is required with the filing of this response.

This response is filed with a Certification and Request for Consideration under the After Final Consideration Pilot Program 2.0.

The following amendments and remarks are respectfully submitted. Reconsideration of the claims is respectfully requested.

CERTIFICATION AND REQUEST FOR CONSIDERATION UNDER THE
AFTER FINAL CONSIDERATION PILOT PROGRAM 37

Practitioner/Agent No.:	Application No.:	Filing Date:
First Named Inventor:	Title:	

APPLICANT HEREBY CERTIFIES THE FOLLOWING AND REQUESTS CONSIDERATION UNDER THE AFTER FINAL CONSIDERATION PILOT PROGRAM 37 (AFCP 37) OF THE ACCOMPANYING RESPONSE UNDER 37 CFR 1.106.

- The above-identified application is (i) an original utility, plant, or design nonprovisional application filed under 35 U.S.C. 111(a) (a continuing application (e.g., a continuation or divisional application) is filed under 35 U.S.C. 111(a) and is eligible under (ii), or (ii) an international application that has entered the national stage in compliance with 35 U.S.C. 371(c).
- The above-identified application contains an outstanding final rejection.
- Submitted herewith is a response under 37 CFR 1.106 to the outstanding final rejection. The response includes an amendment to at least one independent claim, and the amendment does not broaden the scope of the independent claim in any aspect.
- This certification and request for reconsideration under AFCP 37 is the only AFCP 37 certification and request filed in response to the outstanding final rejection.
- Applicant is willing and available to participate in any interview requested by the examiner concerning the present response.
- This certification and request is being filed electronically using the Office's electronic filing system (EFS-Web).
- Any fees that would be necessary consistent with current practice concerning responses after final rejection under 37 CFR 1.106, e.g., extension of time fees, are being concurrently filed herewith. (There is no additional fee required for request reconsideration under AFCP 37.)
- By filing this certification and request, applicant acknowledges the following:

- Patent applications and examination proceedings are not eligible to participate in AFCP 37.
- The examiner will notify that the AFCP 37 submission is non-compliant, i.e., that the requirements of the program have been met (see items 1 to 7 above). For compliant submissions:
 - The examiner will review the response under 37 CFR 1.106 to determine if additional search and/or consideration (i) is necessitated by the amendment and (ii) could be completed within the time allotted under AFCP 37. If additional search and/or consideration is required but cannot be completed within the allotted time, the examiner will process the submission consistent with current practice concerning responses after final rejection under 37 CFR 1.106, e.g., by treating an advisory action.
 - If the examiner determines that the amendment does not necessitate additional search and/or consideration, and if the examiner determines that additional search and/or consideration is required and could be completed within the allotted time, then the examiner will consider whether the amendment places the application in condition for allowance (after completing the additional search and/or consideration, if required). If the examiner determines that the amendment does not place the application in condition for allowance, then the examiner will contact the applicant and request an interview.
 - The interview will be conducted by the examiner, and if the examiner does not have negotiation authority, a primary examiner and/or supervisory patent examiner will also participate.
 - If the applicant declines the interview, or if the interview cannot be scheduled within ten (10) calendar days from the date that the examiner first contacts the applicant, then the examiner will proceed consistent with current practice concerning responses after final rejection under 37 CFR 1.106.

Alexandria, VA 22313-1450

Sir Madam:

In response to the Final Office Action dated April 26th, 2019, Applicants respectfully submit this AFCP amendment to the Application of Patent, #133316699, filed December 15th, 2008. This response is filed within the three month period for reply of the mailing date of the Final Office Action, wherefore Applicants believe that no extension of time is required with the filing of this response.

This response is filed with a Certification and Request for Consideration under the AIA's Final Consideration Pilot Program 2.0.

The following amendments and remarks are respectfully submitted. Reconsideration of the claims is respectfully requested.

CLAIMS:

Amended, printed and incorporated (Pages 9 through 13). Additionally supplied is the current claim set text for continued reference to the latest amended changes (Pages 14 through 16).

ISSUE/PROBLEMS:

Drawings not changed.

RECEIVED/REFERENCES:

1. Applicant has submitted amended claims that include an amendment to the independent claim #1 (and its subsequent dependent claims #2, #3 and #4), with said amendment to the claims made in regard to the interview discussion Applicant had with Examiner on June 20th, 2019. Amendments to the claims are presented without broadening the claims in any way.

2. In regard to Examiner's "Response to Arguments", specifically "Classifications - 35 U.S.C. §101", Applicant reaffirms that the claimed invention, in the least, is directed to eligible 35 U.S.C. §101 references, specifically that of:

- a) 'a new and useful Process', and
- b) 'any new and useful improvement thereof'

and has amended the current claim set as discussed and suggested by Examiner Adishankar in the interview dated June 20th, 2019 to have the claims more appropriately address the above eligible 35 U.S.C. §101 references. Applicant appreciates the time that Examiner Adishankar has taken to assist Applicant with the amendments to the claims for better conformity to these 35 U.S.C. §101 references. (Note: In previous replies Applicant has suggested and continues to maintain that the other 35 U.S.C. §101's category's apply to the invention described in the application, specifically that of an article of manufacture and composition of matter, and reserves the rights accordingly for such classification in the future, having the above 35 U.S.C. §101 directed eligible references the only ones referenced herein at this time for eligibility. Applicant believes that when the invention

described and written in the specification and claims is generated that it is an article, be it in electronic form, that was manufactured, having the manufacturing process be that of software development methods. Further, the electronic document that was generated from the manufactured process exists and requires storage, Applicant believes, as an ordered composition of matter having the same layout pattern as the first manufactured generation.)

3. Amendments to rejected claims #1 through #4 have been made and are included (see pages 9 through 13). The latest changes recites the claim text very close to that of the originally included claim set, having the most significant alterations to the text supporting a method based claim type. Details of the changes included in the amended claims submitted with this After Final Office Action AFCIP amendment include the following:

a.) Articulation of currently rejected claims #1 through #4 to read as a method based claim set. Added actions 'writes' to describe the different steps in the method. The claims are directed to a method type claim set as suggested by Examiner Abrahamson during Applicant's June 27th, 2019 telephonic interview with Examiner.

b.) Confirmed a 'narrative standard' character test data description listing in the character test sub paragraph method section where the storing step of said test is recited to confirm the meaningful limits on the claim scope. In Claim #1 in the sub paragraph where the character test additional components creation and storage method steps are listed, Applicant confirmed the wording 'narrative standard' to describe the character test formatted information data that is being stored, as the main concept of the invention described in the specification and claims is the narrative standard based graphical image and character test format combination, formatted accordingly in said narrative standard based format in the narrative standard electronic document container. Although it was referenced in past claim

000000000000

amendments, the method step needed the specific reference to the normative standard designation.

c.) Removed the "and, if user specified, additional sectional components" sub paragraph section. This conditional claim portion was not part of the originally submitted claims and is unnecessary as the said sub paragraph's functionality was to introduce the additional sectional components used in Dependent's dependent claim 4B's container based digital signature data, having the introduction of the additional components now part of the dependent's claim method steps. Further, claim wording in said "if user specified" section included text that should have been directed to the character test based sectional components, and therefore was removed from this "if user specified" section and amended to the said character test based sectional component method steps sub paragraph wording section. The relocation of the character test's formatted data composition paragraph text restores proper character test format description type sub paragraph wording location. The sectional component intrinsic security feature data "coupling", the 4-44g integrity attribute, originally included in the initial claims set describes the sectional coupling and intrinsic data generation as needed, having no requirement for the repetitive intrinsic data coupling attribute modification. Additional component sections can be included and worded with as the user specifies, having the mention of each method claim narrowing and removable without additional prior art searches done.

d.) Reference to "at least one overall data integrity check value" originally listed in the initially submitted claim set has been made within the amended claims, revised to make reference to said data integrity check value, one that is intrinsic as a result of a step in method claim, having the text removed in prior amended claim submissions when the claim's were directed to "an electronic document" or "an cryptographic signature" tangible object, having said tangible object's final

composition's "hash value" a value available after said object's generation and not an actual part of said generated object, derived from the generated object's content, composition or otherwise "information".

4. In support of the process for the Securable Independent Electronic Document invention described in the specification are details that reinforce Applicant's belief that the invention references: a) 'a more and useful Process', and b) 'any more and useful improvement thereof' of 35 U.S.C. §101. Multiples of two types of currently "world wide" ISO standard formats involved in computer processing: graphic image file formats and at least one or more character text file formats are mentioned and suggested to be in combination, using 'a more and useful Process' to create 'a more and useful improvement thereof', allowing improvements to the functioning of a computer, or to any other technology or technical field with the described electronic document, allowing effective transformation of simple image files to a more secure interactive and purposeful electronic document container for information asset management. Enhanced operations and functionalities that are not available in the separate basic computing conceptual frameworks become available with the said combination. Further, in the specification many references are made to the usage of a computing device, having the majority of computing devices available today supporting the electronic document's generation, use and storage.

5. The electronic document and its method of generation described in the specification and claims exceed a simple data structure definition and is a combination of conventional elements in a conventional manner that includes functionality processes incorporating tangible digital type items. Further, the electronic document generation process includes incorporated structural limitations with and in conjunction to multiple unique and original user defined and specified data objects and/or elements in various systematic steps to methodically incorporate, use, maintain or otherwise manipulate said data object elements.

6. Previously on April 3rd, 2014, Applicant submitted three (3) additional claims that were method and system based claims. Applicant submitted these additional new claims with a request for Continued Examination (RCE). Applicant later, with his most amendment filed, removed these claims believing, in error, that the addition of said new claims was incorrect for the current prosecution phase, causing further rejections and/or problems with the application file, leaving Applicant planning to add such claims during the continued examination (CCE) period.

7. Applicant understands and accepts that the removal of these newly added RCE was done in error by Applicant; nevertheless, Applicant only wishes to inform the Office and the Examiner that these claims directed to a method and system were constructed by Applicant because the claim types are applicable to subject matter of the described invention.

8. In previous claim amendments Applicant has done his best to make amendments based on Examiner objections and was not fully aware of the requirements of claim construction for 35 U.S.C. §110, having applicant believe that the wording, described processing steps and overall claim interpretations in combination with the included specification described in sufficient detail and appropriateness the invention, allowing:

"a person having ordinary skill in the art, a person of (ordinary) skill in the art, a person skilled in the art, a skilled addressee or simply a skilled person who is presumed to be aware of all the pertinent prior art to be able to obtain an understanding of the invention";

having said person be that of the Examiner as well; Applicant can appreciate instances where a understanding may not be fully obtained by another and submits this reply and amendment to further such understanding. Applicant appreciates the patience of all those involved in working with Applicant's during the prosecution of the described application.

9. Furthered understanding and determination of what the Applicant has invented by reviewing the entire application disclosure and construing the claims in accordance with their broadest reasonable interpretation (BRI) is desired by Applicant for the Examiner, and when considered in its totality, the application for patent is for more than just a data structure as indicated by the Examiner, and that the generation of said method and system claims support the 'Subject Matter Eligibility Criteria' as outlined and described for 35 U.S.C. §101.

10. Therefore, the 'method based' claim set for the creation of an electronic document supporting specific platform and nonessential party independence for securing information exchange, described in the specification and presented amended claims supports and adheres to, as Applicants truly and honestly believe, meets the conditions and requirements of 35 U.S.C. §101 for patent eligibility.

CONCLUSION:

11. For all the above reasons, Applicant submits that the amended claims are now in proper form to overcome 35 U.S.C. §101 rejections and define patentability over the prior art.

12. Applicants, inasmuch as there being no further outstanding objections or rejections, therefore submits that this application is now in condition for allowance which Applicants respectfully solicit.

Respectfully submitted,
